

Is lovespokenhere.com a scam? TrustSniffer's high-risk assessment:
0/100

lovespokenhere.com

Verdict

0

OUT OF 100

CRITICAL RISK

lovespokenhere.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-19 by automated analysis. Classification confidence 55%.

What this site appears to be

Server returned 403 Forbidden (openresty). No content, links, forms, or business info present.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	13 flagged it VirusTotal	RISK
Google Safe Browsing	Not listed Google	CLEAR
Abuse reports on the host	0 reports AbuseIPDB; shared hosting inflates this count	NOTED
Domain age	1.1 years old Registered history	CLEAR
Web archive	Archived since 2006 Public history exists	CLEAR
Certificate	Encrypted connection Issued by Network Solutions RSA DV SSL CA 4	NOTED

What lovespokenhere.com served when TrustSniffer captured it on 2026-08-19. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2006.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website currently presents visitors with a 403 Forbidden response generated by openresty, exposing no business description, products, contact information, forms, or other substantive content; its apparent purpose and operating model therefore cannot be established from the accessible page.

Scam/Impersonation Risk

The site presents a **critical sensitive-interaction risk** because external security intelligence records a confirmed blacklist signal and multiple malicious detections. This is materially more significant than the absence of visible phishing mechanics on the captured page: the page contains no login form, payment form, wallet connection, redirects, or active external requests, but it also provides no content that could explain or rebut the external detections. Historical records provide evidence of earlier domain presence, while the current registration record indicates a substantially newer registration; that provenance discrepancy should be treated as unresolved rather than as proof of continuity. No conflicting legal-entity names or page-level brand impersonation were observed.

EVIDENCE

- The homepage returned HTTP 403 with the page title “403 Forbidden” and the server identifier “openresty/1.25.3.1”; no forms or business information were present.
- External reputation checks recorded 13 malicious detections, including tier-one detections from Fortinet and Sophos, and confirmed blacklist status from two external sources.
- The domain was registered on 2025-07-10 and is recorded as approximately 1.11 years old.
- Historical records contain 24 archive snapshots spanning 2006–2021, with 16 years tracked.

Regulatory Verification Notes

The available page does not disclose an operator, legal entity, licensing position, registration number, or regulated-service status. Because the site is currently inaccessible beyond a server-denial page, licensing and corporate disclosures cannot be validated from the website itself; this is a substantive verification gap, not an independent finding of illegality. Identity verification remains unconfirmed. The technical environment does provide limited infrastructure legitimacy signals—registration through Network Solutions, LLC and a valid domain-validated certificate—but those controls do not resolve the external reputation concern or establish who operates the site.

EVIDENCE

- The domain registrar is Network Solutions, LLC.
- The site’s TLS certificate is issued by Network Solutions RSA DV SSL CA 4, uses DV validation, and is valid through 2026-11-25.
- The accessible homepage contains no operator name, legal notice, license number, registration number, or regulated-entity disclosure.

What to Verify Next

Before any sensitive interaction, an institution should independently identify the operating entity and confirm any claimed authorization directly with the relevant corporate or financial-services registry. Contact details should be validated through an offline or independently sourced channel rather than relying solely on information that may later appear on the site. Given the confirmed external threat signals, login, credential submission, financial transfers, and installation of site-requested software should not proceed unless those checks produce satisfactory, independently corroborated results.

EVIDENCE

- The homepage is an access-denied response and provides no business or ownership information from which an operator can be independently validated.
- The external reputation record contains a confirmed blacklist signal and 13 malicious detections.
- No login, payment, wallet, or other sensitive form was present in the captured page.

Summary Verdict

The overall posture is critical and unsuitable for sensitive interaction on the available evidence. The site cannot presently be treated as an established legitimate service, and its real-world operator remains unverified.

Infrastructure Integrity

The site resolves directly to one likely origin address rather than a CDN edge, with no CDN or WAF identified. It is hosted by NETWORK-SOLUTIONS-HOSTING – Network Solutions, LLC, US, on AS19871; this identifiable hosting arrangement is a limited technical positive, but it provides no assurance that the site’s content or operator is trustworthy.

Closing Assessment

Engagement should remain suspended for credentials, financial activity, or other sensitive actions until independent operator, authorization, and contact-channel checks have been completed and the external reputation concern has been satisfactorily resolved.

Written analysis generated 2026-08-19 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of lovespokenhere.com.

- The request stayed on lovespokenhere.com. It was not redirected to another domain. CLEAR
- Registration is published under Network Solutions, LLC. CLEAR
- DNS for this domain is served by worldnic.com, across 2 name servers. NOTED
- The registration is paid up to 2027-07-10. NOTED
- The earliest public archive of this site is from 2006-07-26. CLEAR
- It is hosted on NETWORK-SOLUTIONS-HOSTING, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about lovespokenhere.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
