Full analysis

Overview

LPC Produtora Musical is a Brazilian music-production and booking agency website presenting festival creation, event archives, artist portfolios, videos, streaming channels, and booking contacts, with an apparent business model based on festival production, artist representation, licensing, and client engagements.

Scam/Impersonation Risk

No contradictions were observed: there are no reported phishing, impersonation, malicious-content, or blacklist indicators in the supplied evidence. The homepage presents a coherent cultural-production portfolio, naming artists and historical events such as Heineken Concerts, Rock in Rio, Bridgestone Music Festival, and Tropicália 2, rather than soliciting deposits, investments, or sensitive credentials. The site also provides links to Instagram, YouTube, and Facebook, which supports—but does not independently prove—the apparent connection to LPC Projetos Culturais. The available evidence is therefore consistent with an established, apparently legitimate website, while the real-world operator identity remains likely rather than independently verified.

EVIDENCE

- Homepage: portfolio content identifies LPC Produtora Musical and presents festival-production work, artist materials, videos, and booking-related content.
- Homepage: no login form, hidden sensitive form, wallet connection, credential-harvesting element, or financial solicitation was detected.
- Domain registration record: registered 2004-08-06; age 22.05 years.
- Historical web records: coverage spans 2009-11-13 through 2026-03-16, representing 18 years tracked; archival coverage is incomplete and does not indicate suspicious repurposing.

Regulatory Verification Notes

The site operates as a cultural-production and booking agency rather than presenting itself as a financial or otherwise regulated service. No license or registration number is claimed in the supplied site content, so regulatory verification is not the primary issue; the relevant transparency question is whether contracting parties can independently confirm the legal entity, contracting terms, and payment arrangements. The registration record names LPC Projetos Culturais, but that attribution should not be treated as conclusive proof of the current operator's identity. A separate broker-reputation comparison produced no match, which is contextual reputational support rather than a legal or licensing determination.

EVIDENCE

- Registration record: owner field is "LPC Projetos Culturais," with creation date 2004-08-06 and expiration date 2028-08-06.
- Hosting infrastructure: served from AS16276, OVH - OVH SAS, FR.
- Transport encryption: TLS certificate issued by YR2 with DV validation, valid to 2026-11-15.
- Site classification: homepage identified as a portfolio/agency page with a low-risk corporate business model and no claimed financial licence.

What to Verify Next

Before a commercial engagement, the prospective counterparty should confirm the contracting entity and authorised representative through an independent business registry or an offline contact route, obtain written event, booking, licensing, cancellation, and refund terms, and ensure that any payment method provides appropriate dispute and payment-protection rights. Contact channels should also be cross-checked against the agency's established social profiles before credentials or payment details are exchanged.

EVIDENCE

- Homepage: identifies the agency's production portfolio and booking purpose but does not provide a structured legal or licensing disclosure.
- Homepage: links to Instagram, YouTube, and Facebook, providing independent channels against which official contact details can be compared.
- Site interaction analysis: no sensitive submission form or untrusted form destination was detected.
- Business model evidence: revenue is described as arising from client engagements for production, booking, licensing, and related agency services rather than user deposits.

Summary Verdict

The overall posture is **high trust and low risk**, with the available evidence consistent with an established, apparently legitimate website and no observed scam or impersonation contradictions. Confidence in the classification is strong enough to support normal evaluation of the agency, but the operator’s real-world identity is not independently proven.

Infrastructure Integrity

The site is protected by a CDN/WAF arrangement, and the observed address was an edge endpoint rather than an exposed origin candidate. This is a mitigating security-control signal that reduces direct infrastructure exposure, but it is not proof of business legitimacy.

EVIDENCE

- Hosting infrastructure: one observed CDN/WAF edge address, 51.222.44.130; no likely origin address was identified.
- Infrastructure resolution: the site resolved successfully through the protective edge layer, with the edge associated with OVH - OVH SAS, FR.

Closing Assessment

Ordinary browsing and preliminary engagement are proportionate to the assessed posture; commercial commitments should proceed through documented contracts, independently confirmed counterparties, and payment methods with suitable dispute protections.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about lpcprojetosculpturais.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
