

# Is luckyfish.co.za safe? TrustSniffer's moderate-trust assessment: 65/100

luckyfish.co.za

## Verdict

65

OUT OF 100

MODERATE TRUST

luckyfish.co.za is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Safe for Read-Only

Dynamic Interaction Caution

Assessed 2026-08-13 by automated analysis. Classification confidence 55%.

What this site appears to be

Site appears to be an online gambling operator (Lucky Fish) offering casino games and sports betting. The page includes license numbers and regulatory board references for South African provinces, responsible gambling disclaimers, deposit/how-to information, and app/social references.

## Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
  - Module-level completeness metadata is unavailable for this legacy report.

## Key findings

---

- Automated classification: Safe for Read-Only.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

## Full analysis

---

### Overview

Lucky Fish is an online casino and sports-betting website that presents casino games, sports markets, registration and deposit functions, promotions, responsible-gambling information, and a companion mobile application, indicating a wagering business model based on user deposits and gambling activity.

### Scam/Impersonation Risk

No contradictions were observed. The available evidence does not identify phishing, brand impersonation, conflicting legal identities, or active malicious-reputation findings. The site's apparent gambling purpose is consistent across its presentation, so the principal concern is financial and regulatory exposure inherent to the service rather than an identified scam or impersonation pattern. Identity verification remains incomplete, meaning the apparent legitimacy of the website should not be treated as independent proof of the real-world operator.

#### EVIDENCE

- The homepage identifies the service as “Lucky Fish | Online Casino & Sports Betting” and presents casino, sports, racing, and instant-game categories.
- External reputation checks recorded 0 malicious detections and 0 suspicious detections, with no phishing indicator identified.
- Domain registration: 2006-07-26; age 20.06 years; registrar DIAMATRIX C.C.; registrant organization recorded as Hollywood Connect.

### Regulatory Verification Notes

The homepage and associated information areas present references to South African provincial gambling boards, license numbers, responsible-gambling disclaimers, FICA upload instructions, cooling-off functions, and deposit guidance. These disclosures are positive indicators of an operating gambling service, but the supplied evidence does not independently verify the stated licensing or establish the operator's legal identity. The on-page regulatory position should therefore be regarded as an apparent claim requiring confirmation rather than as a regulatory determination. The business model also warrants a measured posture because deposits and wagers expose users to direct financial loss even where responsible-gambling information is displayed.

#### EVIDENCE

- The homepage includes license-number and South African provincial gambling-board references, according to the page content assessment.
- The site provides “Disclaimer,” “Info/Help,” “Upload FICA Now,” “How to Deposit,” and cooling-off functions in its visible navigation.
- Served from AS13335 (CLOUDFLARENET - Cloudflare, Inc., US).
- TLS certificate issued by WE1 with DV validation, valid to 2026-11-05T13:29:48+00:00.

#### What to Verify Next

Before material financial activity, the stated license numbers should be checked directly with the relevant South African provincial gambling authorities, and the legal operator named in those records should be matched to the site’s official business and payment documentation. The withdrawal, dispute, age-verification, account-closure, and responsible-gambling terms should also be reviewed, with contact channels confirmed through an independent route rather than relying solely on the website. Any application should be obtained only through an independently confirmed official distribution channel.

#### EVIDENCE

- The site exposes licensing and regulatory references on its homepage but the supplied evidence contains no independent licensing confirmation.
- The visible navigation includes deposit guidance, FICA submission, cooling-off controls, disclaimer information, and app-download content.
- The site’s visible account features include registration and login prompts, making operator and payment-channel verification relevant before sensitive use.

#### Summary Verdict

The overall posture is **moderate trust**. The website appears operational and internally consistent with the service it presents, and no scam or impersonation contradiction was identified; however, confidence in the underlying real-world operator is not sufficient for unqualified reliance in high-value financial activity.

#### Infrastructure Integrity

Cloudflare CDN and WAF protection fronts the website, and all observed addresses were CDN edge servers rather than independently exposed origin infrastructure. This provides a meaningful mitigation against direct origin exposure but limits independent assessment of the hosting environment; it is a protective infrastructure characteristic, not proof of legitimacy.

#### Closing Assessment

Prospective users should keep initial engagement proportionate and complete the stated independent checks before committing substantial funds or undertaking other sensitive financial actions.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

#### What the analysis found

---

1 finding contributed to this verdict, raised by behaviour in a sandbox.

## 01 Dynamic Interaction Caution

- The page made background requests to destinations TrustSniffer does not recognise.

## Identity verification

|                                  |            |
|----------------------------------|------------|
| Status                           | UNVERIFIED |
| Identity score                   | 30/100     |
| Identity verification confidence | 50%        |

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

## What TrustSniffer observed

First-party facts recorded during the assessment of luckyfish.co.za.

- The request stayed on luckyfish.co.za. It was not redirected to another domain. [CLEAR](#)
- Registration is published under DIAMATRIX C.C.. [CLEAR](#)
- DNS for this domain is served by cloudflare.com, across 2 name servers. [NOTED](#)
- The registration is paid up to 2027-07-26. [NOTED](#)
- It is hosted on CLOUDFLARENET, from a server in US. [NOTED](#)

## About this assessment

A trust score summarises the evidence TrustSniffer could collect about luckyfish.co.za at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
