

Is luckywoodsh.com legit? TrustSniffer's high-trust assessment: 80/100

luckywoodsh.com

Verdict

80

OUT OF 100

HIGH TRUST

luckywoodsh.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 70%.

What this site appears to be

Company site for LuckyWood (奇兴家居) describing 20 years of custom furniture manufacturing, service flow, quality control, product categories and contact information. Appears to be a standard corporate/contact page in Chinese (with some English).

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2017.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This is the LuckyWood (奇兴家居) corporate website for a furniture manufacturer presenting approximately 20 years of customized production services, including residential, hotel, office, and display furniture, with a B2B/B2C model based on custom manufacturing, product sales, and business inquiries.

Scam/Impersonation Risk

No contradictions were observed. The available page content does not show phishing, brand impersonation, malicious solicitation, credential harvesting, or a sensitive login workflow; the only form identified is a standard contact form. The site's detailed manufacturing, customization, quality-control, and service-flow content is consistent with an ordinary corporate business presence rather than an abuse-oriented operation. Available external checks reported no malicious or suspicious detections and no confirmed threat-list hit.

EVIDENCE

- The homepage describes custom furniture manufacturing, supplier controls, production management, and four product categories, with no financial, cryptocurrency, or credential-collection features.
- The contact page contains a contact form without sensitive-field handling or an untrusted submission destination.
- The domain was registered on 2016-06-06 and is approximately 10.21 years old.
- Historical records contain 666 snapshots spanning 2017–2026, with 10 years tracked.

Regulatory Verification Notes

The website presents an apparent Chinese corporate operating context and includes ICP and public-security filing identifiers in its footer. However, the available pages do not present a sector-specific license, regulator, or licensing number; for a furniture manufacturer this is a disclosure and verification matter rather than evidence of deception. The real-world operator remains independently unverified, so the site's apparent corporate identity should not be treated as conclusively established. The absence of a matching broker entry in the available third-party dataset provides limited contextual reassurance but is not a licensing or regulatory determination.

EVIDENCE

- The homepage footer displays the ICP identifier 沪ICP备15052352号-3 and the public-security filing identifier 沪公网安备31011402021392号.
- The navigation exposes About, Services, Social Responsibility, Contact, and Careers pages, providing a conventional corporate information structure.
- The site's transport encryption uses a DV certificate issued by Encryption Everywhere DV TLS CA - G2, valid through 2026-10-22.

What to Verify Next

Before credential or payment interactions, an independent counterparty check should match the business name, registration details, and commercial contact information against the relevant corporate or filing registry. Any proposed order should also be governed by a written quotation or contract that identifies the contracting entity, delivery obligations, returns or remedies, and payment-protection arrangements. Contact channels should be confirmed through an independently sourced route rather than relying solely on the website.

EVIDENCE

- Relevant corporate and filing registries can be used to confirm the entity associated with the identifiers shown in the site's footer.
- The site's sales and inquiry model makes a written contract, counterparty name, delivery terms, and payment protections material pre-transaction checks.
- The About and Contact sections provide the natural points against which independently obtained merchant details can be reconciled.

Summary Verdict

Available evidence supports a **high-trust, low-risk posture** consistent with an established, apparently legitimate corporate website. This classification is not proof of the real-world operator's identity; legitimacy is evidence-consistent but remains independently unverified.

Infrastructure Integrity

The site is protected by a CDN/WAF layer, which is a mitigating control against direct exposure and common web abuse but is not proof of legitimacy. Confirmed technical evidence places the observed service address at 43.143.114.245 on AS45090, operated by TENCENT-NET-AP – Shenzhen Tencent Computer Systems Company Limited in China; the origin server was not observable in the analysis.

EVIDENCE

- Hosting infrastructure: AS45090, TENCENT-NET-AP – Shenzhen Tencent Computer Systems Company Limited, CN; observed IP 43.143.114.245.
- TLS certificate: Encryption Everywhere DV TLS CA - G2, validation level DV, valid to 2026-10-22T23:59:59+00:00.

Closing Assessment

Ordinary engagement may proceed subject to independent confirmation of the contracting entity, applicable commercial terms, and payment protections before credentials or funds are submitted.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of luckywoodsh.com.

- The request stayed on luckywoodsh.com. It was not redirected to another domain. CLEAR
- Registration is published under Alibaba Cloud Computing Ltd. d/b/a HiChina (www.net.cn). CLEAR
- DNS for this domain is served by hichina.com, across 2 name servers. NOTED
- The registration is paid up to 2034-06-06. CLEAR
- The earliest public archive of this site is from 2017-07-30. CLEAR
- It is hosted on TENCENT-NET-AP, from a server in CN. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about luckywoodsh.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
