## Full analysis

### Overview

Luminexpress is a Moroccan online retailer serving consumers and professionals with lighting fixtures and home-decor products, including chandeliers, pendant lights, wall and ceiling lights, lamps, outdoor lighting, and accessories, with revenue derived from direct product sales and delivery across Morocco.

### Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing indicators, or other confirmed scam signals were observed. The site presents a coherent retail identity, while tested interactions revealed no hidden forms, credential forwarding, cloaking, wallet activity, clipboard interference, or suspicious inline scripts. External threat-intelligence checks were clean, and the available archive records show no domain repurposing or material change in business category.

- The domain-registration record identifies Aymen nacer as the registrant and NINDO HOST as the registrar; registered 2025 (~1.47 years old) and currently recorded through 2027.
- The web archive contains 4 snapshots spanning 2025-02-24 to 2025-04-09 (1 year tracked), with no detected semantic drift or suspicious repurposing.
- The ecommerce homepage showed no brand-impersonation indicators, hidden forms, login form, sensitive form, untrusted form destination, or phishing-related browser behaviour.
- External reputation telemetry recorded 0 malicious and 0 suspicious detections in the evaluated threat set, with no malicious safe-browsing result or external threat listing.

### Regulatory Verification Notes

The site operates as a conventional lighting retailer rather than a financial, investment, or other regulated-service platform. Its homepage provides a Casablanca business address and multiple contact methods, and links to sales, shipping, returns, privacy, and legal policies. The available evidence does not establish the content of those linked legal disclosures, so the precise contracting entity and applicable commercial registration details cannot be assessed from the supplied pages; this is a limited disclosure-verification matter, not evidence of deception.

- The homepage presents cash on delivery, free delivery above 400 Moroccan dirhams, a one-year warranty, satisfaction-or-refund messaging, and clearly displayed product prices and promotions.
- The homepage links visitors to sales, shipping, return, privacy, and legal-policy pages.

- The site's transport encryption uses a DV TLS certificate issued by YE1, valid to 2026-09-08.
- The hosting telemetry identifies AS13335, operated by CLOUDFLARENET — Cloudflare, Inc., US.

**What to Verify Next**

For higher-value or business purchases, the contracting party shown at checkout should be matched to the legal-policy and invoice details. Buyers should also review the return conditions, warranty scope, delivery terms, and refund process before ordering, and independently confirm the official contact channels when arranging substantial or bespoke transactions.

- The homepage advertises a satisfaction guarantee and refund proposition whose operative conditions should be read in the linked sales and returns policies.
- The homepage offers a lighting-recommendation calculator; analysis found no sensitive-data fields or untrusted submission destination.
- The site states that delivery is available throughout Morocco and payment can be made upon delivery.
- The homepage publishes physical-address, telephone, and email contact options that can support independent order confirmation.

**Summary Verdict**

The website presents a legitimate, established, and trustworthy ecommerce operation with a coherent commercial identity, clean external reputation, stable tested behaviour, and no contradicting risk signals. The evidence supports normal interaction, including account login, ordinary purchases, and standard account activity.

**Infrastructure Integrity**

The site is protected by Cloudflare CDN/WAF infrastructure. The single observed address, 23.227.38.65, was an edge address rather than a confirmed origin; this reduces direct origin exposure and provides a meaningful security mitigation, although protective infrastructure alone does not establish business legitimacy.

**Closing Assessment**

Prospective customers may use the site normally, applying standard ecommerce diligence to order terms and retaining transaction and warranty documentation for significant purchases.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

**What the analysis found**

No rule findings contributed to this verdict.

**Identity verification**

## About this assessment

A trust score summarises the evidence TrustSniffer could collect about luminexpress.ma at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
