

Is luminogloz.com safe? TrustSniffer's low-trust assessment: 25/100

luminogloz.com

Verdict

25

OUT OF 100

LOW TRUST

luminogloz.com is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Company website for Luminogloz, an LED OEM manufacturer in Chennai. Contains product catalog entries, company background, production facility details, USP, warranty claim, contact information including phone numbers and email, and a physical address.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The page as captured

<https://luminogloz.com/>

What luminogloz.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2011.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

This website presents itself as Luminogloz, a Chennai-based B2B LED OEM manufacturer offering panel lights, flexible strips, profile lights, rigid bars, downlights, and related custom manufacturing services. Its homepage and company pages describe a production facility, research and development capabilities, product catalog, warranty claims, and business contact details, indicating a corporate product-and-manufacturing model rather than a consumer financial or credential-collection service.

Scam/Impersonation Risk

Confirmed external contradiction signals materially outweigh the site's otherwise conventional corporate presentation. The site content contains no identified phishing forms, login mechanisms, or brand-impersonation indicators, and the stated LED-manufacturing purpose is internally coherent. However, external reputation checks recorded a confirmed blacklist hit from two sources, together with multiple malicious and suspicious detections. This supports a clearly cautionary posture for sensitive interactions; the available evidence does not establish whether the detections arise from the current content, historical abuse, shared infrastructure, or another attribution. No conflicting legal identities, direct impersonation, or page-level phishing indicators were observed.

EVIDENCE

- External reputation checks recorded 6 malicious detections, 2 suspicious detections, and a confirmed blacklist hit.
- The homepage is classified as a corporate/product-catalog page and contains no login form, hidden sensitive form, or wallet-connection mechanism.
- Historical coverage records 54 archive snapshots spanning 2011–2026, with 16 years tracked; no suspicious repurposing or semantic category drift was identified.

Regulatory Verification Notes

The About, Production Facility, and Contact pages provide an apparent operating identity for Luminogloz and describe an LED manufacturing business, but the real-world operator is not independently verified by the available evidence. The site does not present a license, registration number, or regulatory authority, although such disclosures may not ordinarily be expected for a lighting manufacturer; this remains a corporate-identity and transaction-transparency gap rather than standalone evidence of fraud. No matching broker-related third-party signal was identified. The domain's age and standard transport-security configuration are supportive technical indicators, but they do not resolve the external reputation contradiction or prove operator identity.

EVIDENCE

- The domain was registered on 2010-11-29 and is 15.73 years old; the registrar is PDR Ltd. d/b/a PublicDomainRegistry.com.
- The site is served from AS24940, HETZNER-AS – Hetzner Online GmbH, DE.
- The TLS certificate is issued by YR2, uses DV validation, and is valid to 2026-10-07.

What to Verify Next

Before any commercial commitment, an independent corporate-registry check should confirm the legal entity behind the Luminogloz name and its authority to enter OEM supply contracts. The physical address and telephone details on the Contact page should be validated through an independently sourced route, and sample orders, warranty terms, invoicing details, and payment protections should be checked before funds or sensitive business information are exchanged. Security operations should independently adjudicate the external reputation alerts and confirm that any permitted interaction is limited to the minimum necessary scope.

EVIDENCE

- The About and Contact pages are the stated sources for the company identity, business description, address, and contact details.
- The Product and Production Facility pages provide the basis for validating whether the claimed manufacturing capability corresponds to a real operating business.
- The site's published warranty and product information should be reconciled with any quotation, purchase order, or supply agreement before engagement.

Summary Verdict

The overall posture is **low trust with elevated sensitive-interaction risk**. The website has a coherent apparent business purpose and some supporting technical and historical indicators, but confirmed external contradiction signals prevent the available evidence from supporting normal sensitive engagement or treating the operator identity as established.

Infrastructure Integrity

The site benefits from CDN/WAF protection, which provides a mitigating layer against direct exposure of the hosting environment. The observed edge infrastructure is associated with AS24940 and Hetzner Online GmbH, while the origin server was not observable in this analysis; this protective arrangement should not be treated as proof of legitimacy.

Closing Assessment

Passive review may be appropriate for preliminary information gathering, but account creation, credential submission, sensitive document exchange, and financial commitment should remain restricted until the independent business and reputation checks are resolved.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01 Governance Risk

 - Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	LIKELY
Identity score	73/100
Identity verification confidence	37%

- Trusted social count=1

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of luminogloz.com.

- The request stayed on luminogloz.com. It was not redirected to another domain. CLEAR
- Registration is published under PDR Ltd. d/b/a PublicDomainRegistry.com. CLEAR
- DNS for this domain is served by hostcontrol.pro, across 2 name servers. NOTED
- The registration is paid up to 2026-11-29. NOTED
- The earliest public archive of this site is from 2011-03-04. CLEAR
- It is hosted on HETZNER-AS, from a server in DE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about luminogloz.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
