

Is m-one.net safe? TrustSniffer's low-trust assessment: 25/100

m-one.net

Verdict

25

OUT OF 100

LOW TRUST

m-one.net is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Corporate/product site for M ONE, a manufacturer of premium silicone sealants, sprays and cleaning agents. Includes product categories, quality claims, company history (since 1995), contact details and legal pages; appears to sell to trade and consumers.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What m-one.net served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 1999.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

M ONE is a commercial product website presenting premium silicone sealants, technical sprays, paints, coatings, and cleaning agents for craftsmen, industrial users, and households, with product information, quality claims, company background, contact details, and inquiry-oriented sales support.

Scam/Impersonation Risk

The site presents a coherent manufacturer profile and its pages contain no obvious malicious forms, wallet functions, credential prompts, or suspicious browser behavior. However, this positive page-level presentation is outweighed by confirmed external threat detections and blacklist status reported by multiple sources, producing a material risk for sensitive interaction. The domain also has a strong similarity signal to “one.one,” although the available evidence does not establish brand impersonation or a conflicting legal identity. The contact page publishes the address “info@m-one.net,” which is a contact-channel integrity anomaly because the address uses a domain closely resembling another recognized domain; this should not be treated alone as proof of fraud. No contradictions were observed in the form of a confirmed phishing page, explicit impersonation, or multiple conflicting legal-entity names, but the confirmed blacklist findings are sufficient to make login, credential submission, financial activity, and other sensitive interactions inappropriate.

EVIDENCE

- External reputation results record 3 malicious and 2 suspicious detections, with the domain blacklisted by two named sources.
- The homepage and product pages describe M ONE as a sealant, spray, coating, and cleaning-agent manufacturer, with no login form, password form, wallet connection, or hidden sensitive form detected.
- The homepage's brand and content profile shows a similarity signal to "one.one"; the available page analysis records suspected similarity but not confirmed impersonation.

Regulatory Verification Notes

The site includes About, Contact, and legal pages and describes production in Germany and the Netherlands, together with a business history claim dating from 1995. Those on-site claims establish the commercial narrative but do not independently verify the real-world operator. The available disclosure state is unclear, and no licensing authority or license number is supplied; for a manufacturer, this is a transparency and verification matter rather than standalone evidence of a scam. A broker-intelligence dataset returned no match, which provides no affirmative regulatory or reputational clearance. The central regulatory concern is therefore the combination of unverified operator identity, unclear corporate disclosure, and the separate confirmed external blacklist signal, rather than the absence of a financial-services license.

EVIDENCE

- The About page claims M ONE has operated since 1995 and states that products are manufactured in Germany and the Netherlands.
- The Contact and legal pages are present, but the supplied content does not provide a licensing authority or license number.
- Domain registration records identify OpusDNS GmbH as registrar; the domain was registered on 2020-06-29 and has an age of 6.14 years.
- Hosted on AS51167 (CONTABO - Contabo GmbH, DE); the transport certificate is DV, issued by YR2, and valid to 2026-09-30T09:40:21+00:00.

What to Verify Next

Before any sensitive engagement, the prospective counterparty should independently confirm the legal entity behind M ONE through an official corporate registry and validate the stated German and Dutch production claims with manufacturer or distributor records obtained through an offline or independently sourced channel. Any commercial transaction should be conditioned on independently confirmed invoicing details, delivery terms, returns, warranty coverage, and payment protections. Official contact routes should also be confirmed through an independent source rather than relying solely on the website.

EVIDENCE

- The About page supplies business-history and manufacturing-location claims but does not independently establish the responsible legal entity.
- The legal and Contact pages provide places for commercial and corporate information, while the available disclosure state remains unclear.
- The site is presented as a product catalog and inquiry channel rather than a platform with a documented regulated-service authorization.

Summary Verdict

The website has a professional commercial presentation and a plausible manufacturer business model, but its overall posture is low trust because confirmed blacklist and malicious-detection signals create a material risk for sensitive interaction. The operator's real-world identity remains unverified, so the site should not be treated as an established legitimate counterparty for credentials, financial activity, or other high-impact engagement.

Infrastructure Integrity

The site resolves directly to hosting operated by Contabo GmbH in Germany, with no CDN or WAF identified and a single likely origin address exposed. The valid DV TLS certificate provides transport encryption, but hosting and TLS are infrastructure protections only and do not offset the external reputation risk.

Closing Assessment

Sensitive interaction should be suspended pending independent confirmation of the operator, the commercial counterparty, and the legitimacy of any proposed transaction through trusted external channels.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status

UNVERIFIED

Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of m-one.net.

- The request stayed on m-one.net. It was not redirected to another domain. [CLEAR](#)
- Registration is published under OpusDNS GmbH. [CLEAR](#)
- DNS for this domain is served by contabo.net, across 3 name servers. [NOTED](#)
- The registration is paid up to 2028-06-29. [CLEAR](#)
- The earliest public archive of this site is from 1999-01-25. [CLEAR](#)
- It is hosted on CONTABO, from a server in DE. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about m-one.net at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
