Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Maanvi Kitchen Appliances is a corporate website for an Eastern India–based manufacturer and supplier of commercial kitchen and hotel equipment, presenting product categories, sector coverage, and turnkey project services for hospitality and food-service customers.

Scam/Impersonation Risk

No contradictions were observed. The website presents a coherent small-business profile rather than an impersonation, phishing, or abuse-oriented service, and the reviewed behavior showed no login form, sensitive data form, wallet connection, hidden form, cloaking, or suspicious script activity. Its domain registration and historical continuity are consistent with an established web presence, although these signals do not independently prove the real-world operator's identity.

EVIDENCE

- The homepage identifies the business as a manufacturer and supplier of commercial and hotel equipment and contains no detected phishing or brand-impersonation indicators.
- The domain was registered in 2021 and is approximately 5.63 years old.
- Historical records show 70 archive snapshots spanning 2021–2025, covering 5 tracked years, with no detected suspicious repurposing or semantic drift.
- Behavioral testing recorded 2 successful runs, with 0 hidden forms, 0 wallet-connection runs, 0 suspicious inline scripts, and no cloaking.

Regulatory Verification Notes

The available evidence is consistent with an established, apparently legitimate commercial supplier, but the real-world operator identity is not independently verified. The site's business and contact materials include GST information, while the reviewed pages do not present a licensing claim or license number; this is a disclosure point to resolve only where a proposed transaction or service would require regulated authorization. Registration privacy is an administrative limitation rather than evidence of misconduct. The transport layer and hosting arrangements provide additional technical integrity signals, while not constituting legal or regulatory validation.

EVIDENCE

- The contact and business pages provide company contact details and GST information.
- The domain registration lists PDR Ltd. d/b/a PublicDomainRegistry.com as registrar and expires on 2027-01-05T09:24:01Z.
- TLS uses issuer YE1 with Domain Validation (DV), valid through 2026-11-13T17:37:35+00:00.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, 0 abuse reports, and no blacklist or Google Safe Browsing hit; coverage was partial.

What to Verify Next

Before credential or payment interactions, an independent counterparty check should confirm the merchant's legal identity and GST details through the relevant official registry or an offline contact route. Any applicable sector authorization should be confirmed with the competent regulator, and prospective purchasers should establish the return, warranty, delivery, invoicing, and payment-protection terms before committing funds.

EVIDENCE

- The contact page provides the business details needed for an independent merchant-identity and GST comparison.
- The site's stated activity is commercial equipment supply and turnkey project work, so any authorization check should be matched to the specific transaction and service scope.

Summary Verdict

The overall posture is **high trust and low risk**, with the available evidence consistent with an established, apparently legitimate website and no observed scam, phishing, impersonation, or other contradictory signals.

The principal remaining uncertainty concerns independent attribution of the real-world operator, not evidence of malicious conduct.

Infrastructure Integrity

The website is protected by an AWS CDN/WAF architecture, which is a mitigating control against direct origin exposure but is not, by itself, proof of legitimacy. The observed edge infrastructure resolves through Amazon Web Services, and the origin server was not exposed in the observed resolution.

EVIDENCE

- Served from AS16509 (Amazon.com, Inc.; AWS), with the observed edge IP 122.248.229.151 in Singapore.
- Infrastructure facts identify AWS CDN/WAF protection, 1 observed edge IP, and 0 likely origin IP candidates.
- The site's TLS certificate is issued by YE1 using DV validation and expires on 2026-11-13T17:37:35+00:00.

Closing Assessment

Routine browsing is proportionate to the assessed posture; before submitting credentials or making a payment, ordinary independent checks of the merchant identity, transaction terms, and payment protections should be completed.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of [maanviappliances.com](#).

- The request stayed on [maanviappliances.com](#). It was not redirected to another domain. CLEAR
- Registration is published under PDR Ltd. d/b/a PublicDomainRegistry.com. CLEAR
- DNS for this domain is served by [glosoft.in](#), across 2 name servers. NOTED
- The registration is paid up to 2027-01-05. NOTED
- The earliest public archive of this site is from 2021-12-10. CLEAR

- It is hosted on AMAZON-02, from a server in SG. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about [maanviappliances.com](#) at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
