Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is a Japanese lifestyle and food media platform presenting recipes, recipe videos, trend reporting, outings, health and beauty content, product features, event information, and sponsored articles. Its apparent business model is editorial publishing supported by advertising, public-relations partnerships, social engagement, and promotion of an associated app.

Scam/Impersonation Risk

No scam, phishing, impersonation, blacklist, or identity-contradiction signals were observed. The homepage and accessible site structure are consistent with an editorial media service rather than a site soliciting deposits or collecting high-sensitivity credentials. Interaction testing did identify dynamic page changes, external network activity, and console errors, but no hidden forms, externally submitted password forms, wallet activity, clipboard manipulation, or cloaking; these observations are more consistent with a feature-rich media page and advertising or app-related functionality than with credential harvesting. The available evidence therefore supports an apparently legitimate, low-risk presentation, while the real-world operator identity remains likely rather than independently verified.

EVIDENCE

- The homepage is categorized as lifestyle/media and contains recipes, food and drink, trend, travel, and sponsored-content sections; no fraud indicators were recorded.
- Interaction testing recorded 72 external XHR requests, 46 external posts, 44 console errors, and a maximum post-interaction DOM difference of 5,242; hidden forms, password submissions, wallet connections, and cloaking were not detected.
- External reputation checks recorded 0 malicious and 0 suspicious detections, with no blacklist or phishing result; the site's traffic rank was 20,438 and it was within the top 1 million.
- Domain registration records show registration on 2014-01-07, an age of approximately 12.6 years, and an expiry date of 2027-01-31.

Regulatory Verification Notes

The site presents as a consumer media publication, not as a financial, brokerage, or other regulated-service provider. No regulated-service license claim or registration number was identified on the reviewed content; this is a disclosure and verification consideration rather than evidence of fraud. The available identity evidence is consistent with an established website, including linked social presence, but does not independently prove the

legal entity operating the site. No adverse broker-dataset match was identified, although that contextual result is not a licensing determination.

EVIDENCE

- The homepage title identifies the service as “macaroni [マカロニ]” and a lifestyle media outlet focused on enriching daily life through food.
- The site exposes About and Login paths, while the homepage includes links to Instagram and YouTube.
- The site is served on AS20940 by AKAMAI-ASN1 — Akamai International B.V., NL.
- The transport certificate is issued by YR1 at DV validation level and is valid through 2026-11-08.

What to Verify Next

Before credential or payment interactions, an organization should confirm the operator name and contact details through the site’s About or legal information pages and independently confirm that any app, promotion, or sponsored offer is associated with the same service. For any purchase or paid promotion reached through the publication, the applicable merchant’s return terms, payment protections, and dispute process should be checked separately. Where a regulated activity is ever offered, the relevant Japanese registry should be consulted directly rather than relying on on-site claims.

EVIDENCE

- The About page is available as a distinct internal site destination for operator and service information.
- The Login path is present, making account-purpose and authentication-flow review relevant before credential use.
- The homepage labels sponsored material as “PR,” providing a basis for distinguishing editorial content from promotional offers.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a high-trust, low-risk posture. No contradictory indicators were observed, although the available evidence does not independently verify the real-world operator identity.

Infrastructure Integrity

The website is protected by Akamai CDN/WAF infrastructure, and all observed addresses were CDN edge servers rather than identifiable origin hosts. This reduces direct exposure of the origin and is a mitigating infrastructure signal, but it is not, by itself, proof of legitimacy.

Closing Assessment

Normal browsing is proportionate to the assessed posture; credential or payment use should follow ordinary independent checks of the relevant operator, merchant terms, and payment protections.

Written analysis generated 2026-08-12 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	76%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of macaro-ni.jp.

- The request stayed on macaro-ni.jp. It was not redirected to another domain. CLEAR
- DNS for this domain is served by akam.net, across 6 name servers. NOTED
- The registration is paid up to 2027-01-31. NOTED
- It is hosted on AKAMAI-ASN1, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about macaro-ni.jp at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
