## Key findings

---

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2022.
- No flags from the reputation services TrustSniffer consulted at assessment time.

## Full analysis

---

### Overview

Macpay is a Brazilian B2B IoT company presenting connected vending-machine hardware and subscription services for Pix and voucher payments, RFID-based employee consumption limits, monitoring, backup equipment, and operational support.

### Scam/Impersonation Risk

No contradictions were observed across the supplied evidence. The homepage presents a coherent corporate offering, with ordinary subscription monetization, clear product categories, contact pathways, and no phishing, impersonation, malware, or high-risk financial indicators. Historical continuity and clean external reputation further support the conclusion that the site is an established operating business rather than an impersonation site.

- The homepage describes Macpay One and Macpay RF, Pix and voucher payments, RFID controls, monitoring, and business subscriptions without detected fraud indicators.
- The domain was registered on 2021-06-17 and is approximately 5.13 years old.
- The site has 131 archive snapshots spanning December 2022 through May 2026, covering 5 tracked years.
- External reputation checks recorded zero malicious and zero suspicious detections, with no blacklist or phishing finding.

### Regulatory Verification Notes

The site operates as a commercial IoT and vending-machine services provider rather than presenting itself as a licensed financial institution. The supplied homepage evidence does not show a claimed regulatory license or registration number; this is a limited disclosure point for procurement and contracting review, not evidence of deception. No broker-related match or adverse third-party reputational signal was identified.

- The homepage identifies a corporate/B2B IoT vending-machine business and recurring equipment-service model.
- The site's transport encryption uses a DV certificate issued by WE1, valid through 2026-10-15.
- The domain is served through AS13335, operated by Cloudflare, Inc., in the United States.

### What to Verify Next

Before a business relationship is finalized, procurement teams should confirm the contracting legal entity, subscription terms, equipment-support obligations, payment settlement arrangements, and applicable business registrations through independent corporate documentation.

- The homepage provides product, support, FAQ, contact, WhatsApp, and system-access pathways for follow-up review.

- The stated business model is based on equipment subscriptions and related operational services, making contract and service-level verification the relevant next step.

Summary Verdict

Macpay presents as a legitimate, established, and trustworthy B2B technology provider. The evidence converges on a coherent operating business with normal website behavior, sustained presence, clean reputation signals, and no observed identity or fraud contradictions.

Infrastructure Integrity

The website is protected by Cloudflare CDN/WAF infrastructure, and all observed addresses are CDN edge servers rather than exposed origin candidates. This materially reduces direct origin exposure and is a mitigating infrastructure signal, though it is not independently proof of legitimacy.

Closing Assessment

Normal interaction, including account login and standard business use, is appropriate; prospective commercial engagement should proceed through ordinary procurement and contractual controls.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

|                                  |        |
|----------------------------------|--------|
| Status                           | LIKELY |
| Identity score                   | 76/100 |
| Identity verification confidence | 76%    |

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of macpay.com.br.

- The request stayed on macpay.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-06-17. NOTED
- The earliest public archive of this site is from 2022-12-01. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

## About this assessment

A trust score summarises the evidence TrustSniffer could collect about macpay.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
