

Is madebyyana.ca a scam? TrustSniffer's high-risk assessment: 0/100

madebyyana.ca

Verdict

0

OUT OF 100

CRITICAL RISK

madebyyana.ca shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Website for Made By Yana, a Winnipeg-based tailoring and alterations shop offering walk-ins, emergency on-the-spot service, appointments, bespoke tailoring, bridal/grad alterations, uniform services, and contact information including phone, email, and physical address.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What madebyyana.ca served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

What appears to be a local Winnipeg tailoring and alterations website, Made By Yana presents walk-in and emergency garment repairs, appointments, bespoke tailoring, bridal and graduation-dress alterations, uniform services, a physical business location, and ordinary phone, email, and booking channels for paid in-person services.

Scam/Impersonation Risk

The site's visible content is consistent with a conventional local tailoring business and the page-level review found no login form, sensitive form, cryptocurrency functionality, or explicit brand-impersonation indicators. However, this benign presentation is materially contradicted by external security telemetry recording six malicious detections and a confirmed blacklist status across two external sources. Runtime inspection also identified suspicious inline scripts, unapproved outbound posts, substantial document changes after interaction, and abnormal network activity. These signals create a substantial risk that the website or its delivery environment could expose visitors to harmful or unauthorized activity, even though the visible business content

itself contains no obvious scam language. No separate identity contradiction between legal-entity names was observed.

EVIDENCE

- The homepage and service pages describe tailoring, alterations, appointments, and local shop services without financial, cryptocurrency, or credential-collection features.
- Behavioral inspection recorded 3 suspicious inline scripts, 2 non-whitelisted external posts, and a maximum post-interaction DOM difference of 1823.
- External reputation telemetry recorded 6 malicious detections and a confirmed blacklist status; a Fortinet detection was also recorded.
- The site's forms analysis identified 1 contact form and an appointment-booking link, with no sensitive form or login form detected.

Regulatory Verification Notes

The About, Contact, and related business pages present the operating name "Made By Yana," a Winnipeg location, telephone contact, service descriptions, and booking arrangements, but independent connection of the website to a real-world operator remains unverified. No licensing or registration claim was identified on the reviewed pages; for a tailoring business this is a disclosure and verification matter rather than, by itself, evidence of a scam. The available third-party broker dataset contained no matching broker record and provides no regulatory conclusion. The domain is registered through Netfirms, LTD, and the site uses a valid domain-validated TLS certificate; these are infrastructure and administrative facts, not proof of operator identity or safety.

EVIDENCE

- Domain registration: 2018-07-02T21:35:10Z; age 8.14 years; registrar Netfirms, LTD; expiration 2027-07-02T21:35:10Z.
- Hosting: AS13335, CLOUDFLARENET – Cloudflare, Inc., US.
- TLS certificate: issuer WE1; validation level DV; valid to 2026-11-03T01:26:16+00:00.
- The reviewed About and Contact pages provide a business name, physical address, telephone number, and service information, while no license number or licensing authority is stated.

What to Verify Next

Before any sensitive interaction, an independent party should confirm that the physical shop, telephone contact, and appointment arrangements correspond to a genuine operating business, using an offline or independently sourced contact route rather than relying solely on the website. Any applicable local business registration or sector-specific requirement should be checked directly with the relevant authority. Credentials, payment details, or other sensitive information should not be submitted while the external security detections remain unresolved.

EVIDENCE

- The Contact page supplies the stated physical location and telephone channel for independent confirmation.
- The booking workflow is exposed as an appointment link rather than a credential-login process.
- The reviewed pages identify the business model as paid tailoring, alteration, and uniform services rather than a regulated financial activity.

Summary Verdict

The overall posture is **critical and unsuitable for sensitive interaction**. Although the site presents coherent local-business content, the confirmed external security contradictions and unresolved identity verification outweigh the reassuring appearance of the pages. Ordinary visual browsing should not be treated as evidence that login, credential, payment, or other sensitive activity is safe.

Infrastructure Integrity

Cloudflare CDN/WAF protection provides a mitigating layer against direct exposure of the underlying service, but protective delivery infrastructure cannot establish legitimacy or offset the external security findings. The observed infrastructure was edge-mediated, so infrastructure characteristics should not be treated as independent confirmation of the operator.

Closing Assessment

Engagement should remain limited to non-sensitive observation until the blacklist status, malicious detections, and business identity have been independently resolved through trusted channels.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat

- The page sent data to a destination TrustSniffer does not recognise.

Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS

- The page rewrote itself after it was interacted with, so what a visitor first sees is not what they end up on.

Behaviour in a sandbox rule:BEHAV_DOM_DIFF_AFTER_INTERACTION

- Most of what the page loaded came from other domains rather than from this one.

Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH

- The structure of the page changed sharply while it was loading.

Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE

- The page carried inline scripts written in a style TrustSniffer treats as suspicious.

Behaviour in a sandbox rule:BEHAV_SUSPICIOUS_INLINE_SCRIPTS

- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
--------	------------

Identity score	30/100
----------------	--------

Identity verification confidence	25%
----------------------------------	-----

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of madebyyana.ca.

- The request stayed on madebyyana.ca. It was not redirected to another domain. [CLEAR](#)
- Registration is published under Netfirms, LTD. [CLEAR](#)
- DNS for this domain is served by cloudflare.com, across 2 name servers. [NOTED](#)
- The registration is paid up to 2027-07-02. [NOTED](#)
- The earliest public archive of this site is from 2021-10-24. [CLEAR](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about madebyyana.ca at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
