Full analysis

Overview

Maizey Plastics is a South African supplier and distributor of signage materials, plastics, vinyls, print media, illumination products, equipment, and industrial materials, supported by regional branches and an online shop serving product sales, cutting, and delivery services.

Scam/Impersonation Risk

No contradictions were observed. The site presents a coherent commercial model, extensive product catalog, branch coverage, contact details, policies, and an online shop; its pages show no phishing, impersonation, deceptive-payment, crypto, or other high-risk abuse indicators. External reputation checks recorded no malicious or suspicious detections, supporting the conclusion that the site is a legitimate established business.

EVIDENCE

- The homepage identifies Maizey Plastics and lists signage materials, plastics, vinyls, equipment, industrial products, branches, and online shopping.
- Page analysis recorded zero red flags, no suspected brand impersonation, no login form, and no sensitive external form.
- The domain was registered in 1997 (~29.15 years old); archival records contain 315 snapshots spanning 1999–2026 (28 years tracked).

Regulatory Verification Notes

The site's identity and commercial disclosures are consistent with an established South African distributor, including named business activity, regional distribution, contact information, product information, and customer policies. No regulated financial-service claim or licensing representation is presented; this is a transparency point to confirm only if a particular product or transaction requires sector-specific authorization. A third-party broker-intelligence check found no match and should be treated as contextual rather than regulatory evidence.

EVIDENCE

- The homepage describes a corporate ecommerce and distribution business rather than a financial or investment service.
- The domain registrar is xneelo (Pty) Ltd, and the registered organization is Maizey's (PTY) LTD.
- Hosted on AS37153 (Xneelo (Pty) Ltd, South Africa).
- TLS certificate issued by YR2 (DV), valid to 2026-09-06.

What to Verify Next

For procurement or higher-value commercial engagement, confirm the relevant Maizey branch, product availability, quotation, payment instructions, and return terms through the contact details and policies published on the site. Where a regulated product or jurisdiction-specific requirement is involved, confirm the applicable authorization directly with the relevant official registry.

EVIDENCE

- The site publishes multiple regional branches and contact details.
- The site provides product, delivery, cutting-service, and policy information.
- The online shop supplies a direct channel for ordinary product purchasing.

Summary Verdict

The website has a high-trust posture and is a legitimate, established commercial ecommerce presence. Its identity, business model, technical operation, historical continuity, and clean reputation converge without contradictory signals. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The site resolves directly to infrastructure operated by Xneelo, with one identified hosting address and no detected CDN or WAF layer. This is a conventional hosting posture and does not undermine the site's legitimacy; the valid TLS deployment provides transport protection.

Closing Assessment

Normal browsing, account login, and ordinary purchasing are appropriate, subject to standard commercial controls for order confirmation and payment authorization.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about maizey.co.za at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
