Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2003.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is the corporate online presence of Major Express, a Russian courier and freight-logistics provider offering domestic and international express delivery, consolidated road freight, cargo handling and insurance support, with shipment tracking, price calculation, contract-enquiry and customer-account functions.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing indicators or deceptive financial propositions were observed. The service model is coherent across the homepage: operational logistics services are supported by shipment tools, service rules, delivery restrictions, current notices and conventional business contact information. The domain's long history and extensive archival record materially reinforce provenance, with no evidence of suspicious repurposing or an established shift from an unrelated business category. External threat-reputation checks were clean, and the site holds an established global traffic position.

- Domain registration records show creation on 15 June 2003, making the domain approximately 23.15 years old; the registrar is RU-CENTER-RU and registration extends to 15 June 2027.
- The web archive contains 885 snapshots from 8 December 2003 through 2 August 2026, spanning 24 tracked years, with no detected suspicious repurposing.
- External reputation telemetry recorded 0 malicious and 0 suspicious detections, no search-safety finding, no external threat-list hit and no reported abuse against the assessed infrastructure.
- The homepage presents express courier delivery, consolidated freight transport, shipment tracking, cost calculation, cargo-insurance support and operational service notices as an internally consistent logistics offering.

Regulatory Verification Notes

Major Express presents a clear corporate identity through its physical Moscow address, telephone number, customer-service routes and published service-rule links. The supplied content does not assert a regulated financial, investment or brokerage activity, and no financial-services licence claim is made; licensing is therefore not a legitimacy dependency for the business model shown. The organization-validated certificate independently associates the encrypted site with Major Express LLC, strengthening the connection between the domain and the named operating entity. No adverse broker profile was matched, although that contextual result is not a legal or regulatory determination.

- The homepage identifies a business location at 2 Dobrolyubova Street, Building 1, Moscow 127254, and publishes a Moscow telephone contact.

- The homepage navigation includes service rules, prohibited or dangerous cargo guidance, packaging information, a cookie policy and an external reference to the Russian tax authority.
- The site's transport encryption uses an OV certificate issued by GlobalSign RSA OV SSL CA 2018 to Major Express LLC, valid until 27 November 2026.
- The hosting environment is served from AS57724 by DDOS-GUARD LTD in Russia.

What to Verify Next

For procurement or counterparty onboarding, the contracting entity’s registered particulars, signatory authority, insurance terms and applicable service conditions should be reconciled with the proposed agreement. Delivery restrictions and liability provisions should be checked against the shipment type and destination, while official contact channels should be confirmed through an independent corporate source when initiating a material commercial relationship.

- The homepage provides a dedicated contract-initiation function suitable for obtaining formal terms.
- Separate service-rule and prohibited-cargo resources are presented for express delivery and consolidated freight.
- The site supplies an electronic waybill facility and a guarantee-letter form, indicating document-based shipment workflows.
- The observed forms were limited to site search and shipment tracking; neither collected sensitive credentials nor submitted to an untrusted destination.

Summary Verdict

The website is a legitimate, established and trustworthy corporate logistics site. Its identity, operating purpose, historical provenance, reputation and technical controls converge without contradictory indicators, supporting a high-confidence assessment suitable for ordinary business engagement.

Infrastructure Integrity

The site resolves directly to a single likely origin address rather than operating behind a CDN; no edge network was detected. The DDOS-GUARD-hosted environment provides identifiable network attribution, and valid organization-validated TLS protects data in transit, although infrastructure protection alone is not treated as proof of legitimacy.

Closing Assessment

Normal interaction, including shipment enquiries, tracking, account login and standard service use, is appropriate; formal counterparty checks remain suitable for material contracts under ordinary enterprise onboarding practice.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100

Identity verification confidence	50%
No on-site identity signals detected	
Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.	
What TrustSniffer observed	
First-party facts recorded during the assessment of major-express.ru.	
- The request stayed on major-express.ru. It was not redirected to another domain. CLEAR - Registration is published under RU-CENTER-RU. CLEAR - DNS for this domain is served by ru., across 5 name servers. NOTED - The registration is paid up to 2027-06-15. NOTED - The earliest public archive of this site is from 2003-12-08. CLEAR - It is hosted on DDOS-GUARD, from a server in RU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about major-express.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
