

Is makedesigneasy.com legit? TrustSniffer's high-trust assessment: 95/100

makedesigneasy.com

Verdict

95

OUT OF 100

HIGH TRUST

makedesigneasy.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

What this site appears to be

Make Design Easy is a Tuscaloosa-based design studio offering fixed-price brand identity, custom website design, UX audits, design sprints and monthly maintenance. The site lists pricing tiers, process steps, case studies, contact details (phone, email, physical address) and standard policies (privacy, terms).

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2016.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Make Design Easy is a Tuscaloosa, Alabama-based design studio offering fixed-price brand identity, custom website design, UX audits, design sprints, social-media design, and ongoing maintenance for businesses, with project inquiries, pricing information, portfolio material, contact details, and standard privacy and terms pages supporting a conventional agency-service model.

Scam/Impersonation Risk

No contradictions were observed across the available site, behavioral, and reputation evidence. The homepage presents ordinary agency services rather than financial, cryptocurrency, investment, or credential-harvesting activity; its claims of “280+ Projects delivered,” “5 yrs In business,” “\$0 Hidden fees,” and nationwide clients are marketing assertions, but they do not constitute an impersonation signal. Available external checks recorded no malicious or suspicious findings, and no phishing, brand-impersonation, or abuse pattern was identified. The domain’s historical record also shows continuity without suspicious repurposing, although historical continuity does not independently establish the present operator’s identity.

EVIDENCE

- The homepage identifies the business as “Make Design Easy,” a Tuscaloosa brand and web design studio, and lists design services, pricing, process information, and portfolio content.
- The contact workflow is a lead-capture form without a password field, external sensitive-form destination, wallet connection, or hidden form.
- Domain provenance records show 8 archive snapshots from 2016-03-13 through 2025-07-10, covering 10 years tracked; the reconciled domain age is 10.43668720054757 years.

Regulatory Verification Notes

The site appears consistent with a small U.S. design-services business rather than a regulated financial provider. Its privacy and terms pages provide standard policy coverage, while the homepage supplies a telephone number, email address, and physical location. No license claim or license number is presented in the supplied content; for this business model, that is a transparency and verification point rather than evidence of deception. The available evidence supports an apparently legitimate site, but the real-world operator remains independently unverified, so the site’s own business description should not be treated as proof of legal-entity identity.

EVIDENCE

- The homepage title identifies “Make Design Easy | Brand and Web Design Studio - Tuscaloosa, AL,” and the site includes About, FAQ, Privacy, and Terms content.
- The site’s transport encryption uses a certificate issued by Sectigo Public Server Authentication CA DV R36, with DV validation, valid to 2026-11-20T23:59:59+00:00.
- The homepage describes fixed-price project fees and monthly maintenance services, with no regulated-product or financial-services offering identified.

What to Verify Next

Before a prospective client signs a contract, submits sensitive credentials, or makes a payment, independently confirm the contracting entity and the business address through a reliable offline or independently sourced channel. The client should also review the applicable statement of work, cancellation or refund provisions, ownership of delivered assets, and payment-protection options before authorizing a material transaction. If a regulated service is ever represented, its license and authorization should be checked directly with the relevant regulator.

EVIDENCE

- The homepage provides a project-start and pricing-inquiry workflow suitable for confirming the proposed scope and contracting arrangements.
- The site publishes terms and privacy pages that can be reviewed alongside any client proposal or statement of work.
- The site’s observed form activity was limited to contact and lead capture, with no sensitive form detected.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture for its stated design-agency purpose. The principal qualification is that the evidence does not independently verify the real-world operator behind the site.

Infrastructure Integrity

The site is directly hosted rather than fronted by a detected CDN, resolving to one likely origin address in the United States. Namecheap provides the hosting infrastructure, and the resolved configuration presents a straightforward hosting posture; the valid mainstream-issued DV certificate provides transport protection but is not, by itself, proof of business legitimacy.

EVIDENCE

- Hosted on AS22612 (NAMECHEAP-NET - Namecheap, Inc., US), with one resolved IP address, 199.188.206.28, in the US.
- TLS certificate issuer: Sectigo Public Server Authentication CA DV R36; validation level DV; valid to 2026-11-20T23:59:59+00:00.
- CDN detected: false; edge IP count: 0; likely origin IP count: 1.

Closing Assessment

Routine service inquiry is proportionate to the available evidence, while independent identity, contractual, and payment-protection checks should be completed before credentials or funds are committed.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of makedesigneasy.com.

- The request stayed on makedesigneasy.com. It was not redirected to another domain. CLEAR
- Registration is published under NAMECHEAP INC. CLEAR
- DNS for this domain is served by namecheaphosting.com, across 2 name servers. NOTED
- The registration is paid up to 2027-05-06. NOTED

- The earliest public archive of this site is from 2016-03-13. CLEAR
- It is hosted on NAMECHEAP-NET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about makedesigneasy.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
