

Is maltbysltd.co.uk legit? TrustSniffer's high-trust assessment: 95/100

maltbysltd.co.uk

Verdict

95

OUT OF 100

HIGH TRUST

maltbysltd.co.uk appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-01 by automated analysis. Classification confidence 75%.

What this site appears to be

TruyenQQ is a Vietnamese free online manga-reading platform featuring a large catalog of manga, manhwa, manhwa, and related genres, with frequent chapter updates, search and filtering, reading history, follows, comments, and advertising-supported access.

Evidence status and limitations

Evidence completeness: UNKNOWN

Key findings

- Automated classification: Not Scam.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2008.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

TruyenQQ is a Vietnamese free online manga-reading platform presenting manga, manhwa, manhwa, genre filtering, chapter updates, reading history, follows, comments, and advertising-supported access, with optional registration for community features.

Scam/Impersonation Risk

No contradictions, phishing indicators, brand impersonation, or confirmed blacklist findings were observed. The homepage presents a coherent entertainment and content-directory model, while the supplied page analysis found no sensitive forms, credential-harvesting behavior, wallet activity, or suspicious scripts. The site's extensive catalog and routine chapter-update presentation are consistent with its stated purpose.

EVIDENCE

- The homepage identifies the service as an online manga and comic-reading platform with genre navigation and chapter listings.
- The page analysis found no phishing indicators, hidden forms, sensitive forms, or brand-impersonation signals.
- External reputation checks recorded zero malicious detections and zero abuse reports; one unconfirmed suspicious result does not establish maliciousness.

Regulatory Verification Notes

The site operates as an informational entertainment platform rather than a regulated financial service. No licensing claim or registration number is presented, which is a transparency gap relevant to copyright, content-distribution, and corporate accountability review, but it is not evidence of fraud. The historical record and current technical posture support an established online presence, while Namecheap is identified as the registrar.

EVIDENCE

- Domain provenance records first seen on 2008-03-25, an authoritative age of 18.3518 years, and 397 archive snapshots across 13 tracked years.
- The domain is registered through Namecheap, Inc. [Tag = NAMECHEAP-INC].
- The site's homepage describes advertising-supported access and optional registration for reading history, follows, and comments.

What to Verify Next

For enterprise engagement, confirm the operator's legal identity and content-distribution rights through the site's published legal or contact channels and, where relevant, independent copyright or corporate registries. Confirm that any account-registration and advertising practices align with the institution's acceptable-use and data-protection requirements.

EVIDENCE

- The homepage provides the stated business model and user-account functions but does not present a licensing number.
- The page analysis found no external sensitive-form destination or credential-collection workflow.
- The historical record shows continuous archival coverage from 2008 through 2020.

Summary Verdict

The website presents as a legitimate, established, and low-risk entertainment service with a coherent purpose and no observed scam or impersonation contradictions. Normal interaction, including account login and standard use, is appropriate within ordinary organizational policy.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, with observed addresses limited to Cloudflare edge servers and no origin candidate identified. This provides a meaningful protective layer against direct origin exposure, although it is a mitigating infrastructure signal rather than proof of legitimacy.

EVIDENCE

- Hosted on AS13335, CLOUDFLARENET - Cloudflare, Inc., US.
- TLS certificate issued by WE1 with DV validation, valid to 2026-10-26T14:17:13+00:00.
- Four observed IP addresses were identified as Cloudflare edge servers, with zero likely origin addresses.

Closing Assessment

Standard use is appropriate, subject to normal organizational controls for entertainment content, account management, advertising, and copyright compliance.

Written analysis generated 2026-08-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of maltbysltd.co.uk.

- The request stayed on maltbysltd.co.uk. It was not redirected to another domain. CLEAR
- Registration is published under Namecheap, Inc. [Tag = NAMECHEAP-INC]. CLEAR

About this assessment

A trust score summarises the evidence TrustSniffer could collect about maltbysltd.co.uk at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
