

# Is mamaclub.wyethnutrition.hk legit? TrustSniffer's high-trust assessment: 90/100

mamaclub.wyethnutrition.hk

## Verdict

**90**  
OUT OF 100

**HIGH TRUST**

mamaclub.wyethnutrition.hk appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-07-31 by automated analysis. Classification confidence 70%.

What this site appears to be

Hong Kong Wyeth Nutrition Parenting Club page offering pregnancy, breastfeeding, infant nutrition, and child-development articles alongside information about Wyeth products, promotions, and membership. It includes a conventional email-and-password login interface and identifies 惠氏 (香港) 控股有限公司 as the corporate rights holder.

## Key findings

---

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2021.
- No flags from the reputation services TrustSniffer consulted at assessment time.

## Full analysis

---

### Overview

The website is Wyeth Nutrition's Hong Kong parenting club, presenting maternal-health, breastfeeding, infant-nutrition, child-development, product, promotion, and membership content as part of a branded consumer-engagement portal.

### Scam/Impersonation Risk

No identity, phishing, impersonation, or malicious-reputation contradictions were observed. The site's branding, corporate attribution, long-established domain, sustained archival presence, conventional account interface, and benign interaction behavior converge strongly on a legitimate Wyeth Nutrition service rather than a deceptive imitation.

- The homepage identifies 惠氏（香港）控股有限公司 as the corporate rights holder and consistently presents the Wyeth Nutrition and Wyeth Mama Club identities.
- The domain was registered on 14 March 2012 and is approximately 14.39 years old; the registrar is IP TWINS, SAS, with registration extending to 14 March 2027.
- The web archive contains 182 snapshots spanning 12 May 2021 to 14 May 2026, covering 6 tracked years without evidence of suspicious repurposing or semantic drift.
- Technical reputation checks recorded 0 malicious and 0 suspicious detections, no phishing indication, no external threat-list hit, and no matching malicious signatures.

### Regulatory Verification Notes

This is a corporate parenting and nutrition information service, not a financial, brokerage, investment, or return-generating platform. Its content includes Materna maternal supplements and the S-26, 倍力加, ILLUMA, and Ascenda nutrition ranges, together with pregnancy and child-development guidance. No regulated financial activity or corresponding licensing claim is presented; the relevant governance considerations are therefore consumer-health communications, promotion terms, privacy, and membership-data handling rather than financial-services authorization.

- The homepage organizes advice around pregnancy planning, pregnancy, breastfeeding, infancy, and development stages extending beyond two years of age.
- The site presents legal and privacy disclosures alongside a standard membership environment, supporting identifiable corporate governance and data-use transparency.

- The homepage contains two ordinary forms—login and search—and the login requests an email address and password without directing password submission to an external destination.
- No broker profile or third-party regulatory match was identified for the site, consistent with its non-financial business purpose.

**What to Verify Next**

Before membership enrollment, the applicable privacy notice and account terms should be reviewed for consent, retention, and promotional-contact provisions. Offer-specific eligibility and expiry conditions should be checked before relying on member promotions. Pregnancy, breastfeeding, supplement, or infant-feeding decisions should continue to be assessed against qualified clinical advice appropriate to the individual circumstances.

- The membership area advertises member information, activities, and promotional offers, making the associated participation terms relevant to enrollment.
- The login interface provides a persistent-session option, so use on shared devices warrants ordinary session-management precautions.
- The homepage endorses exclusive breastfeeding during the first six months and publishes guidance concerning folic acid, calcium, iodine, iron, selenium, DHA, ultrasound, and maternal nutrition.
- Some interactive functionality requires JavaScript, which is a normal operational prerequisite for the site’s forms.

**Summary Verdict**

The site is a legitimate, established, and trustworthy corporate parenting portal with coherent identity, benign observed behavior, and clean external reputation. Normal interaction, including account registration, login, and standard use, is appropriate.

**Infrastructure Integrity**

The delivery architecture uses established edge infrastructure: the observed application endpoint was served through Fastly, while separate resolution evidence identified AWS CDN/WAF edges. All identified addresses were edge systems rather than demonstrated origin hosts, which reduces direct origin exposure but is a security mitigation, not independent proof of legitimacy.

- The observed server endpoint was 23.185.0.4 on AS54113 (Fastly, Inc., US).
- CDN/WAF resolution identified two AWS edge addresses on AS14618 (Amazon.com, Inc., US).
- The site’s transport encryption uses a valid DV TLS certificate issued by YR1, valid through 21 October 2026.

**Closing Assessment**

Prospective users may engage normally while applying routine account-security practices and reviewing the terms relevant to any membership or promotion they choose to use.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

**What the analysis found**

No rule findings contributed to this verdict.

**Identity verification**

|                                  |        |
|----------------------------------|--------|
| Identity score                   | 30/100 |
| Identity verification confidence | 50%    |

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

## What TrustSniffer observed

First-party facts recorded during the assessment of mamaclub.wyethnutrition.hk.

- The request stayed on mamaclub.wyethnutrition.hk. It was not redirected to another domain. [CLEAR](#)
- Registration is published under IP TWINS, SAS. [CLEAR](#)
- DNS for this domain is served by nestle.com. [NOTED](#)
- The registration is paid up to 2027-03-14. [NOTED](#)
- The earliest public archive of this site is from 2021-05-12. [CLEAR](#)
- It is hosted on FASTLY, from a server in US. [NOTED](#)

## About this assessment

A trust score summarises the evidence TrustSniffer could collect about mamaclub.wyethnutrition.hk at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
