

Is mamarita.com a scam? TrustSniffer's high-risk assessment: 0/100

mamarita.com

Verdict

0

OUT OF 100

CRITICAL RISK

mamarita.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Customer-facing site for Mama Rita: presents brand story, menu items, delivery ordering options via third-party partners, cookbook pre-order and newsletter signup. No signs of credential harvesting or financial-returns promises.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The page as captured

<https://mamarita.com/>

What mamarita.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2003.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Kaspersky flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The Mama Rita website presents a customer-facing Mediterranean food brand, offering a brand story, menu, UAE delivery ordering, links to retail and delivery partners, and a pre-order cookbook model supported by newsletter signup.

Scam/Impersonation Risk

Confirmed external reputation contradictions materially outweigh the site's benign presentation. The homepage and related pages describe an ordinary restaurant and cookbook business, with no observed login form, credential-harvesting flow, financial-return promise, or suspected brand impersonation; however, the domain has been blacklisted by multiple external sources and received multiple malicious detections, including a tier-one vendor detection. This creates a high-risk basis for sensitive interaction despite the website's apparently coherent content. No conflicting legal-entity names were observed, so the issue is external malicious classification rather than an established identity contradiction.

EVIDENCE

- External reputation telemetry recorded 12 malicious detections, with one tier-one vendor identifying a threat.
- The site's homepage and ordering pages contain restaurant, delivery, cookbook, and newsletter content, with no login or sensitive credential form observed.
- The site's transport encryption is present but uses domain validation only, which does not establish operator legitimacy.

Regulatory Verification Notes

The Our Story, Contact, Menu, and Cookbook pages establish the Mama Rita brand and its commercial presentation, but the supplied content does not establish a legal operating entity or independently verified regulatory status. For a food and ecommerce business, this is a disclosure and verification matter rather than proof of fraud. The site should not be treated as a regulated financial service, and no broker or comparable regulated-entity match was identified in the supplied third-party context. The long registration history and mainstream hosting and certificate configuration provide infrastructure continuity, but they do not resolve the external blacklist findings or independently verify the operator.

EVIDENCE

- Domain registered through GoDaddy.com, LLC on 2014-11-13 and currently aged 11.78 years, with expiry recorded as 2027-11-13.
- Hosted on AS15169 (Google LLC); the hosting record identifies the United States as the server country.
- TLS certificate issued by YR2 at DV validation level, valid to 2026-10-15T06:53:59+00:00.
- The Contact and Our Story pages provide brand-facing information but do not, in the supplied content, establish a legal entity or licensing record.

What to Verify Next

Before any purchase, independently confirm that the restaurant, cookbook seller, and delivery arrangements correspond to a real operating business through publicly available business records and established partner listings. Payment should be made only through a protected channel with dispute or chargeback rights, and any fulfillment, refund, or pre-order terms should be confirmed independently. Sensitive account creation or credential submission should not occur unless the external reputation warnings have been resolved and the operator has been independently authenticated.

EVIDENCE

- The site includes separate Our Story and Contact pages that can be compared with independent business records.
- The Order Online page routes activity through external ordering and retail partners, making partner-side confirmation of the merchant relationship possible.
- The Cookbook page identifies a pre-order offering whose seller, fulfillment, and refund arrangements require independent confirmation.

Summary Verdict

The website has a coherent, low-complexity commercial presentation, but its overall trust posture is **critical for sensitive interaction** because confirmed external malicious and blacklist signals are decisive. Apparent brand legitimacy is therefore insufficient to support account, credential, or financial use.

Infrastructure Integrity

The site resolves to a single likely origin address on Google Cloud, with no CDN detected and no CDN/WAF vendor identified in the supplied infrastructure evidence. Google Cloud hosting and the resolved infrastructure provide some operational stability, but hosting-provider protections are mitigating context only and cannot validate the site’s identity or offset the reputation risk.

Closing Assessment

Treat the site as unsuitable for sensitive interaction unless its authenticity and the external threat findings are independently resolved; any permitted transaction should use a protected payment method with meaningful recovery rights.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01 Governance Risk

 - The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
 - Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	39%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of mamarita.com.

- The request stayed on mamarita.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by domaincontrol.com, across 2 name servers. NOTED
- The registration is paid up to 2027-11-13. CLEAR
- The earliest public archive of this site is from 2003-11-27. CLEAR
- It is hosted on GOOGLE, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about mamarita.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
