Full analysis

Overview

Manju's Magic Kitchen is a local direct-to-consumer food business presenting handmade Bikaneri snacks, including puris and khakhra, with product descriptions, prices, delivery information, and ordering through phone or WhatsApp for individual, bulk, and gift purchases.

Scam/Impersonation Risk

No contradictions were observed. The site's content is internally consistent with a small local food vendor: it identifies a Bikaner location, provides a telephone/WhatsApp ordering route, describes ingredients and preparation, and presents ordinary food products rather than financial, investment, or credential-harvesting services. The homepage and contact journey show no login form, sensitive-data form, wallet interaction, hidden form, suspicious script, or brand-impersonation indicator. External checks recorded no malicious or suspicious detections where evaluated, no Google Safe Browsing warning, no blacklist hit, and no abuse reports; coverage was not complete, so this is supportive rather than conclusive evidence.

EVIDENCE

- The homepage presents a local food-shop model with named Bikaneri snack products, prices, ingredients, delivery information, and a Bikaner location.
- The contact and ordering pages use phone/WhatsApp ordering and contain no login or sensitive payment form.
- The domain was registered on 11 May 2026 and is approximately 0.28 years old.
- External reputation results recorded 0 malicious detections, 0 suspicious detections, 0 abuse reports, and no blacklist or Google Safe Browsing hit.

Regulatory Verification Notes

The available evidence supports an apparent small-business food operation, but the real-world operator identity is not independently verified. The site supplies a trading name, location, telephone/WhatsApp contact, product information, and shipping details, yet its legal-entity and applicable food-business registration disclosures are unclear. No licensing or registration number is presented in the supplied site content; this is a transparency and verification matter, not evidence of fraud. The site's product claims—such as handmade preparation, no preservatives, no palm oil, and vegetarian production—are commercial claims that should be assessed against the seller's applicable food-safety and labeling obligations.

EVIDENCE

- The About, Contact, and FAQ areas identify “Manju's Magic Kitchen,” Bothra Chowk in Gangashahr, Bikaner, and a telephone/WhatsApp ordering channel.
- The site provides shipping, delivery, ingredient, pricing, and product-process information but no stated license or registration number.
- Hosted on AS47583 (AS-HOSTINGER — Hostinger International Limited, CY), with infrastructure resolving in Germany.
- TLS uses YR2 with DV validation and is valid to 2026-10-12.

What to Verify Next

Before substantial payment or disclosure of sensitive information, independently confirm the seller's legal or trading identity, the applicable local food-business registration requirements, delivery and refund terms, and the ownership of the advertised contact channels. For an initial transaction, a low-value order and payment method with suitable buyer protection would provide a proportionate way to validate fulfillment.

EVIDENCE

- The Contact page provides the seller's stated location and direct ordering route for independent confirmation.
- The Products and shipping information describe prices, ingredients, delivery scope, and order fulfillment terms to be checked before purchase.
- The About, Process, and FAQ pages provide the seller's operational narrative but do not independently verify the legal operator.

Summary Verdict

The site presents a **moderate-trust posture** consistent with a genuine small local food business and shows no observed scam, phishing, or impersonation contradiction. Confidence is limited because the operator’s real-world identity and governance disclosures are not independently established.

Infrastructure Integrity

The site is directly hosted through AS-HOSTINGER on AS47583, with no CDN detected and two likely origin addresses identified. Clear hosting attribution and valid transport encryption are positive operational signals, but hosting arrangements and TLS alone do not establish business legitimacy.

Closing Assessment

Ordinary, low-value use is proportionate, while independent seller, compliance, fulfillment, and payment-protection checks should precede substantial financial commitments or sensitive disclosures.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about manjumagickitchen.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
