Full analysis

Overview

MapNews is a French-language Moroccan and international news portal presenting royal and government activities, politics, economics, sports, culture, weather, and “SOS Fake News” content, with subscriptions, premium access, contact, search, legal, and RSS functions supporting its public-information publishing model.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent news-media identity, identifies Agence Maghreb Arabe Presse, and contains no phishing forms, deceptive financial offers, wallet-connect functions, or other confirmed abuse indicators. The site’s sustained historical presence and clean external reputation further support an established, non-impersonating service.

- The homepage identifies Agence Maghreb Arabe Presse and provides structured news and public-affairs content.
- The domain was registered in 2012 and is approximately 14.3 years old.
- Historical records contain 5,000 snapshots across 8 tracked years, from 2015 through 2022.
- External reputation checks recorded no malicious or suspicious detections.

Regulatory Verification Notes

The site operates as a news and public-information publisher rather than presenting a regulated financial service. Its legal and contact pathways are available, while the supplied evidence does not establish a specific licensing or corporate-registration disclosure; this is a limited transparency point for institutional due diligence, not evidence of deception. No relevant third-party broker match was identified.

- The homepage provides contact, legal, subscription, and premium-access pathways.
- Registration records list ITISSAL AL-MAGHRIB as registrar.
- The site is served on AS13335 by Cloudflare, Inc.
- Its TLS certificate is issued by WE1 with DV validation and is valid through 2026-09-30.

What to Verify Next

For formal onboarding, confirm the publishing entity and any applicable registration details through the relevant Moroccan public or institutional records, and validate official contact channels using an independently sourced route. Standard account login and ordinary site use are appropriate.

- The homepage supplies the entity name and links to legal and contact functions.

- The site offers subscription and premium-access services that can be matched against the organization’s published terms.
- The domain’s registration record remains active through 2027-04-16.

Summary Verdict

MapNews presents as a legitimate, established, and trustworthy news service with a coherent identity, sustained operating history, clean reputation, and no observed contradictions. Its overall posture supports normal interaction, including account login and standard use.

Infrastructure Integrity

Cloudflare CDN/WAF protection provides a meaningful mitigating control, with observed traffic terminating on Cloudflare edge infrastructure rather than exposing a directly observable origin address. The hosting posture is consistent with mainstream protective web infrastructure.

Closing Assessment

Prospective users and institutions may engage with the site normally, while formal partnerships or procurement should complete the organization-specific documentation checks customary for the relationship.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about mapnews.ma at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
