- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Marcos Auto Center is a local automotive repair and maintenance website serving customers in Americana, São Paulo, with services covering auto-electric work, electronic injection, diagnostics, mechanical maintenance, and assistance for light and heavy vehicles; its apparent business model is to generate service and spare-parts revenue through quotation requests, appointments, and offline customer interactions.

Scam/Impersonation Risk

No contradictions were observed. The site presents a coherent local-service identity, with specific automotive services and customer-support functions rather than deceptive financial, investment, or credential-collection mechanisms. No brand impersonation, phishing indicator, malicious behavior, or suspicious page feature was identified in the supplied analysis. The apparent legitimacy is supported by a long-established domain and consistent historical category, although the real-world operator connection remains likely rather than independently verified.

EVIDENCE

- The homepage identifies Marcos Auto Center and describes auto-electric, electronic-injection, diagnostic, mechanical, roadside-assistance, and vehicle-maintenance services.
- The homepage contains no login form, sensitive form, hidden form, wallet connection, or external password-submission mechanism.
- The domain was registered on 2017-03-21 and is approximately 9.42 years old.
- Historical coverage spans 5 years, from 2021 through 2025, with no detected repurposing or semantic category drift.

Regulatory Verification Notes

The available content is consistent with a local automotive workshop, but it does not present a license, registration number, or formal regulatory disclosure. This is a transparency and verification point rather than evidence of a scam, particularly because no contradictory identity or impersonation signal was found. The registration record names Marcus Vinicius Vieira, but that record does not independently prove that the named person operates the business. Available external reputation checks recorded no malicious or suspicious detections, although coverage was partial.

EVIDENCE

- The homepage does not state a license number, licensing authority, or formal regulatory registration.
- Domain registration records identify the registrant as Marcus Vinicius Vieira.
- The site is served from AS31898, ORACLE-BMC-31898, Oracle Corporation, United States.
- The site's TLS certificate is issued by YR2, uses Domain Validation (DV), and is valid through 2026-10-25.

What to Verify Next

Before a credential or payment interaction, an independent source should confirm that the business name, operating person, service locations, and contact channels correspond to the intended automotive provider. Service scope, quotation terms, warranty or return conditions for parts, and payment protections should also be confirmed through an independently validated channel rather than relying solely on the website.

EVIDENCE

- The homepage publishes separate contact arrangements for light-vehicle and heavy-vehicle services, including physical addresses and telephone numbers.
- The homepage links to an Instagram presence that can be checked for continuity with the business identity and service locations.
- The site is structured for quotation requests and offline appointments rather than direct account-based transactions.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate, low-risk local business website. The overall trust posture is high, with no observed scam or impersonation contradictions; however, the operator's

real-world identity is not independently verified, so legitimacy should be described as apparent rather than proven.

Infrastructure Integrity

The site resolves to Oracle Corporation infrastructure on AS31898, with one identified IP and no detected CDN or edge-IP layer. The valid DV TLS certificate provides transport protection, while the identifiable hosting arrangement offers a normal, non-obfuscated infrastructure profile but should be treated as a mitigating technical signal rather than proof of business legitimacy.

Closing Assessment

Ordinary independent merchant-identity, service-term, and payment-protection checks should precede the submission of credentials or payment details, with routine use otherwise proportionate to the site’s high-trust assessment.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	73/100
Identity verification confidence	74%

- Trusted social count=1

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of marcosautoelettrica.com.br.

- The request stayed on marcosautoelettrica.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by com.br, across 2 name servers. NOTED
- The registration is paid up to 2029-03-21. CLEAR
- The earliest public archive of this site is from 2021-12-17. CLEAR
- It is hosted on ORACLE-BMC-31898, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about marcosautoelettrica.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
