Full analysis

Overview

Marjane.ma is a French-language retail and department-store website presenting online shopping, groceries, home equipment, promotions, a Marjane loyalty card, customer support, and mobile applications. Its apparent business model is to support direct retail sales and in-store purchasing through promotions and loyalty services.

Scam/Impersonation Risk

No contradictions were observed. The reviewed homepage presents ordinary retail content rather than phishing, investment, gambling, or credential-harvesting functionality, and no brand-impersonation indicators were identified. The domain is long-established, external reputation checks returned no malicious or suspicious findings, and the available evidence is consistent with an established, apparently legitimate retail website. The real-world operator identity is nevertheless not independently verified, so the apparent Marjane affiliation should not be treated as independently proven.

EVIDENCE

- The homepage presents online shopping, promotions, groceries, home equipment, loyalty services, customer support, and application downloads; no login or sensitive-data form was visible in the captured page.
- Observed browser behavior showed no hidden forms, suspicious inline scripts, credential-harvesting behavior, wallet-drainer activity, or clipboard manipulation.
- External reputation checks recorded zero malicious detections, zero suspicious detections, and no blacklist hit.
- The domain registration record shows registration on 2013-09-03, making the domain 12.94 years old.

Regulatory Verification Notes

The site provides identifiable legal and commercial navigation, including legal information, terms and conditions, sales conditions, personal-data information, an About section, recruitment information, customer service, and contact pathways. The reviewed material does not provide a licensing authority or license number; for a general retailer this is a disclosure and verification matter rather than evidence of impersonation or fraud. The registration record lists WANA CORPORATE as registrar and “marjane holding” as the recorded owner, but that record does not independently establish the operating legal entity. Transport security and hosting signals are technically sound and support the view that the site is operationally established.

EVIDENCE

- The homepage navigation includes “Informations légales,” “CGU & CGV,” “Données personnelles,” “À propos,” “SAV,” and “Nous contacter.”
- The registration record lists registrar WANA CORPORATE and owner “marjane holding.”
- The site is served from AS13335, Cloudflare, Inc. (CLOUDFLARENET).
- The transport certificate is issued by WE1 with DV validation and is valid to 2026-10-09 13:25:49 UTC.

What to Verify Next

Before credential or payment interactions, an independent check should match the legal entity named in the site’s legal materials with the relevant corporate or commercial registry. The applicable sales conditions, returns process, payment-protection arrangements, and customer-support channels should also be reviewed through the site and confirmed through an independent contact route. Any mobile application should be obtained only through the official distribution path associated with the business.

EVIDENCE

- The homepage provides legal-information and terms-and-conditions pathways that can be compared with independent corporate records.
- The homepage provides customer-service, contact, and application-download pathways suitable for independent confirmation before sensitive transactions.

Summary Verdict

The available evidence supports a **high-trust, low-risk posture** and is consistent with an established, apparently legitimate website. No scam, phishing, impersonation, or identity-conflict indicators were observed, although the available evidence does not independently prove the real-world operator identity.

Infrastructure Integrity

The website is protected by Cloudflare’s CDN and WAF, with all observed addresses belonging to Cloudflare edge infrastructure and no origin-server address identified in the observed resolution. This reduces direct exposure of the origin and is a mitigating infrastructure signal, but it is not proof of business legitimacy.

Closing Assessment

Ordinary browsing and standard use are proportionate to the observed risk posture; independent merchant-identity, return-policy, and payment-protection checks should be completed before entering credentials or making payments.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about marjane.ma at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
