

Is marjanemall.ma legit? TrustSniffer's high-trust assessment: 75/100

marjanemall.ma

Verdict

75

OUT OF 100

HIGH TRUST

marjanemall.ma appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-12 by automated analysis. Classification confidence 70%.

What this site appears to be

Consumer-facing Moroccan marketplace listing a wide range of products (electronics, home, beauty, clothing, baby, sports) with prices in DH, seller names, promotions and delivery references. Site presents category navigation, promotional events and marketplace features such as seller onboarding links.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Marjanemall is a consumer-facing Moroccan online marketplace presenting products across electronics, home, beauty, clothing, baby, sports, and other categories, with prices in DH, seller attribution, promotions, delivery references, return policies, and seller-onboarding functionality. Its apparent business model is marketplace commerce through product sales and seller-related fees.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent retail marketplace rather than phishing, investment, cryptocurrency, or impersonation content, and the available external reputation checks recorded no malicious or suspicious detections. Behavioral testing produced operational anomalies, including extensive external requests, console errors, and a suspicious-network classification; however, the corrected interpretation treated the collection as benign, with no hidden forms, externally submitted password forms, non-whitelisted external posts, malicious scripts, cloaking, wallet activity, or confirmed brand impersonation. These signals therefore do not establish scam or impersonation risk, although they explain why the assessment is not equivalent to independently verified operator identity.

EVIDENCE

- The homepage contains substantial marketplace content, seller names, product categories, DH pricing, promotions, delivery references, and no detected phishing or brand-impersonation indicators.
- External reputation checks recorded 0 malicious detections and 0 suspicious detections; abuse reporting recorded 0 reports and the observed infrastructure was classified as a content delivery network.
- The behavioral test recorded 80 external XHR requests, 1 external POST, 0 non-whitelisted external requests, 2 console errors, 0 hidden forms, and 0 external password forms.
- The domain registration record shows creation on 2020-06-18 and an age of 6.15 years; historical records contain 88 snapshots across 3 tracked years, from 2023-03-08 through 2025-10-16.

Regulatory Verification Notes

Available evidence is consistent with an established, apparently legitimate e-commerce site, but it does not independently verify the real-world operator. The registration record identifies the registrant as “marjane holding” and the registrar as WANA CORPORATE; that record alone does not prove that the legal entity operating the marketplace is the same entity. No licensing authority or registration number is identified in the supplied site

analysis, which is a transparency and verification matter rather than evidence of fraud. The site's substantive commercial presentation, clean reputation signals, stable technical behavior, and valid transport security support its high-trust classification. No broker-related match was identified in the supplied third-party context.

EVIDENCE

- The site's homepage is classified as "Marketplace / Ecommerce," with one shopping and account-related form and no sensitive form detected.
- The registration record lists registrar WANA CORPORATE, creation date 2020-06-18, expiration date 2027-06-18, and registrant "marjane holding."
- Hosting telemetry identifies AS13335, CLOUDFLARENET – Cloudflare, Inc., US.
- The site's TLS certificate is issued by WE1, uses DV validation, and is valid to 2026-10-17.

What to Verify Next

Before credential or payment interactions, an independent check should connect the marketplace to the legal entity named in its commercial, return, and merchant documentation. Applicable commercial registration or consumer-protection requirements should be confirmed through the relevant Moroccan authority where appropriate, and payment methods should be assessed for chargeback or other buyer protection. Official support and contact channels should also be confirmed through an independent route rather than relying solely on details presented within the shopping flow.

EVIDENCE

- The homepage provides delivery and return references that can be checked against the applicable merchant and consumer-protection terms.
- The seller-onboarding functionality indicates that seller-level identity, fulfillment responsibility, and return obligations warrant independent confirmation.
- The shopping-cart and checkout flow provides the appropriate point at which payment-protection terms and transaction controls should be reviewed.

Summary Verdict

The overall posture is **high trust and low risk**, with no observed scam, phishing, impersonation, or other contradictory signal. The convergence of established continuity, substantive commercial content, clean reputation evidence, and sound transport security supports an apparently legitimate marketplace assessment, while operator identity remains independently unverified.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, and all observed addresses were CDN edge servers rather than identified origin candidates. This provides a meaningful mitigation against direct origin exposure and common network-layer abuse, but remains a protective control rather than proof of business legitimacy.

EVIDENCE

- Infrastructure resolution identified Cloudflare CDN/WAF protection with 4 observed edge addresses and 0 likely origin candidates.
- The observed edge infrastructure was associated with AS13335 and Cloudflare, Inc., US.

Closing Assessment

Ordinary use is proportionate to the assessment, subject to independent merchant-identity, return-policy, and payment-protection checks before credentials or payment details are submitted.

Written analysis generated 2026-08-12 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of marjanemall.ma.

- The request stayed on marjanemall.ma. It was not redirected to another domain. [CLEAR](#)
- Registration is published under WANA CORPORATE. [CLEAR](#)
- DNS for this domain is served by cloudflare.com, across 2 name servers. [NOTED](#)
- The registration is paid up to 2027-06-18. [NOTED](#)
- The earliest public archive of this site is from 2023-03-08. [CLEAR](#)
- It is hosted on CLOUDFLARENET, from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about marjanemall.ma at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
