Full analysis

Overview

Dino Polska's website is the official-facing digital presence of a grocery retail chain, presenting food and household-product promotions, prices, store locations, opening information, services, careers, customer contact, newsletters, and company-related information to support in-store consumer sales.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, or other contradictory signals were observed. The homepage's retail content is coherent with a grocery-store business model: it displays ordinary product promotions, prices, store discovery, shopping-list functions, and customer services rather than deceptive financial or credential-harvesting mechanisms. The long-standing domain history, sustained archival continuity, and clean external reputation provide converging evidence of an established online presence.

- The homepage presents grocery promotions, product pricing, store-finder functionality, shopping-list features, and retail services; no phishing or brand-impersonation indicators were detected.
- External checks recorded 0 malicious findings and 0 suspicious findings; the site's traffic rank was 81208 and it was within the top 1 million domains.
- The domain was registered on 2001-07-06T13:00:00Z and is approximately 25.09 years old.
- Archive records contain 678 snapshots spanning 2001–2026, covering 26 years with a maximum observed gap of 1 year.

Regulatory Verification Notes

The site operates as a consumer retailer, not as an evidently regulated financial service. Its available content includes company information, contact facilities, privacy and cookie controls, careers, and customer-facing service information. No regulated-service license claim is evidenced; for this business model, that is a scope and disclosure note rather than an identity contradiction. No matching third-party broker-reputation record was identified.

- The homepage and associated navigation expose company information, contact, privacy/cookie controls, careers, and store-service content.
- Hosting resolved to AS13335, CLOUDFLARENET - Cloudflare, Inc., US.
- TLS uses issuer WE1 with DV validation and is valid to 2026-10-18T11:38:39+00:00.
- No matching third-party broker record was returned.

What to Verify Next

For formal supplier, procurement, or partnership onboarding, independently confirm the corporate details shown on the company-information and contact pages. Before relying on a particular promotion, confirm its current terms, dates, pricing, and store availability through the site's official retail information.

- The homepage provides company-information and contact pathways suitable for independent cross-checking.
- Promotion pages display product prices, discount conditions, and quantity-based offer terms.
- Store-discovery content provides the relevant channel for checking location and availability information.

Summary Verdict

The website presents a legitimate, established, and trustworthy retail presence with strong alignment between its stated business purpose, observed content, historical continuity, and external reputation. Normal interaction, including account login where offered and standard use of the site, is appropriate.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, with observed traffic terminating on CDN edge addresses rather than an exposed origin. This reduces direct origin exposure and is a mitigating security characteristic, although protective infrastructure alone does not establish legitimacy.

- Observed edge IPs were 104.21.38.206, 172.67.138.84, 2606:4700:3030::6815:26ce, and 2606:4700:3034::ac43:8a54; all were associated with AS13335.
- The analysis identified 4 CDN edge IPs and 0 likely origin IPs.

Closing Assessment

Proceed with normal browsing, account activity, newsletter use, and ordinary retail transactions, applying standard checks that offer terms and contact details remain consistent with the official site.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about marketdino.pl at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
