- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2017.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Marketeer Online is a Thai-language editorial publication covering marketing, business, branding, technology, finance, consumer trends, entertainment, and lifestyle, presented through categorized articles, featured content, recent posts, and corporate contact information. Its apparent business model is an established media operation supported by advertising, sponsored content, partnerships, and related commercial activity.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents coherent editorial content rather than deceptive financial offers, phishing mechanisms, or brand impersonation; it contains no login or sensitive-data form, and external reputation checks found no malicious classification, blacklist hit, or abuse reports. The site's sustained historical presence and consistent publication activity further support continuity of identity.

- Homepage: categorized editorial coverage, recent articles, and established publication sections are present.
- Homepage: no login form, hidden sensitive form, wallet interaction, or brand-impersonation indicator was detected.
- Domain registration: registered 2017-05-04, approximately 9.25 years old.
- Web archive: 199 snapshots spanning 2017–2026, with 10 years tracked.

Regulatory Verification Notes

Marketeer Online presents as a media publication rather than a regulated financial service. No license or regulatory registration is claimed in the supplied site evidence; this is a limited disclosure point for parties considering a commercial or sponsored relationship, not an indication of deceptive conduct. The registrar is Wild West Domains, LLC, and the site's transport encryption is valid.

- Homepage: corporate contact information and a clear editorial publishing model are presented.
- Domain registration: registrar identified as Wild West Domains, LLC; expiration is 2027-05-03.
- TLS certificate: issued by WR1 at DV validation level, valid to 2026-09-11.

What to Verify Next

For a paid partnership, sponsorship, or other commercial engagement, confirm the contracting entity, payment instructions, and sponsorship terms through independently sourced business records and an established contact route. If a regulated service is ever offered under the publication's branding, confirm the relevant license directly with the applicable registry before relying on that representation.

- Homepage: corporate contact information is available for independent confirmation.
- Homepage: the visible business model is editorial and media-related, so verification should focus on the specific commercial counterparty and engagement terms.

Summary Verdict

The website is legitimate, established, and suitable for normal interaction, including account login and standard use. The combined editorial, historical, technical, and external-reputation evidence supports a high-confidence trustworthy posture with no observed scam or impersonation indicators.

Infrastructure Integrity

The site is hosted by AUTOMATTIC – Automattic, Inc. in the United States on AS2635. No CDN or WAF was detected, and two likely origin addresses were identified; this is a neutral exposure characteristic, while the identified hosting arrangement and valid TLS provide limited mitigating support rather than proof of legitimacy.

- Hosting: AS2635, AUTOMATTIC – Automattic, Inc, US.
- Network resolution: 2 unique IP addresses, both classified as likely origin addresses; 0 edge IP addresses and no CDN detected.

Closing Assessment

Normal browsing, login, and standard site use are appropriate; any commercial engagement should follow ordinary counterparty, payment, and contractual due diligence.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	76%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about [marketeeronline.co](#) at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
