

Is marocsa.net safe? TrustSniffer's low-trust assessment: 25/100

marocsa.net

Verdict

25

OUT OF 100

LOW TRUST

marocsa.net is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Arabic-language community news site for Moroccans living in Saudi Arabia with articles about events, bank-sponsored initiatives, condolences, sports and cultural activities. Powered by WordPress (Newsup theme). No obvious financial solicitation or credential harvesting.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The page as captured

<https://marocsa.net/>

What marocsa.net served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2018.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

The website is an Arabic-language community news and association portal for Moroccan residents in Saudi Arabia. It presents local announcements, condolences, cultural and sporting activities, community meetings, and articles mentioning sponsorship initiatives involving banks; its apparent business model is informational publishing supported by community partnerships, event promotion, or advertising rather than financial services.

Scam/Impersonation Risk

External threat intelligence identifies a **confirmed blacklist presence**, including four malicious and one suspicious detection, which is the decisive risk signal despite the site's benign apparent purpose. The homepage content does not show an obvious login form, credential-harvesting mechanism, financial solicitation, brand impersonation, or other on-page phishing pattern; this reduces evidence of an active abuse mechanism in the captured page but does not resolve the external reputation contradiction. The site should therefore be treated as unsuitable for sensitive interaction pending independent validation.

EVIDENCE

- External reputation results recorded `vt\_malicious: 4`, `vt\_suspicious: 1`, and `external\_blacklist: true`.
- The homepage contains community articles and announcements, with no sensitive forms detected.
- Registration records show creation on 2016-10-24 and an age of 9.82 years; the registrar is NAMECHEAP INC.
- Archive coverage is recorded from 2018-11-04T10:19:57Z through 2025-06-01T13:28:43Z across 8 years.

Regulatory Verification Notes

The site presents itself as a community and association publication rather than a regulated financial provider. Its visible navigation includes “About Us” and “Contact Us,” but the available page evidence does not establish a named legal operator, regulatory authorization, or registration number. This is a transparency and verification gap rather than independent proof of fraudulent activity; nevertheless, the external blacklist finding materially limits reliance on the site's own identity or purpose claims. No broker or regulated-entity match was identified in the supplied third-party context.

EVIDENCE

- The homepage navigation exposes “About Us” and “Contact Us” pages, while the available capture does not establish licensing or registration details.
- The page content describes community news, events, condolences, sports, cultural activities, and sponsorship-related announcements rather than deposit-taking or investment services.
- The site's transport encryption uses a DV certificate issued by Sectigo Public Server Authentication CA DV R36, valid through 2027-01-05T23:59:59+00:00.

What to Verify Next

An independent check should confirm whether the association has a verifiable legal presence in the relevant Moroccan or Saudi jurisdiction and whether the published contact channels are genuinely controlled by that organization. Any proposed account, credential, payment, donation, or other sensitive transaction should be validated through an independently sourced channel rather than through links or contact details supplied solely by the website. Until those checks are complete, interaction should remain limited to passive reading.

EVIDENCE

- The site's primary navigation provides an “About Us” page that can be compared with independently sourced organizational records.
- The “Contact Us” page provides the natural point for contact-channel validation through an offline or independently obtained route.
- The captured homepage has no login form, sensitive form, hidden form, or wallet-connection behavior.

Summary Verdict

The overall posture is **low trust**, with elevated risk for sensitive interaction. The site's apparent community-news function is not sufficient to offset the confirmed external reputation contradiction, and its real-world operator

remains unverified.

Infrastructure Integrity

The website is hosted directly through Namecheap infrastructure, with no detected CDN or WAF edge layer and a likely origin address exposed through the hosting configuration. This provides limited infrastructure-based mitigation; the hosting arrangement and valid DV TLS certificate establish transport and network facts but do not substantiate legitimacy.

EVIDENCE

- Served from AS22612 (NAMECHEAP-NET - Namecheap, Inc., US).
- Hosting provider: NAMECHEAP-NET - Namecheap, Inc.; country: US; registry: ARIN.
- TLS certificate issuer: Sectigo Public Server Authentication CA DV R36; validation level: DV; valid to 2027-01-05T23:59:59+00:00.
- Infrastructure facts record ``has_cdn: false`, `edge_ip_count: 0`, and `likely_origin_ip_count: 1`.`

Closing Assessment

Prospective users should restrict activity to non-sensitive viewing and should not proceed with credential submission or financial interaction unless independent organizational and contact-channel validation produces satisfactory results.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
--------	------------

Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of marocsa.net.

- The request stayed on marocsa.net. It was not redirected to another domain. CLEAR
- Registration is published under NAMECHEAP INC. CLEAR
- DNS for this domain is served by namecheaphosting.com, across 2 name servers. NOTED
- The registration is paid up to 2027-10-24. CLEAR
- The earliest public archive of this site is from 2018-11-04. CLEAR
- It is hosted on NAMECHEAP-NET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about marocsa.net at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
