Full analysis

Overview

Maroc Traduction is a corporate language-services website presenting translation, interpretation, localization, content development, marketing, training, and conference-equipment services for businesses and individuals in Morocco and internationally.

Scam/Impersonation Risk

The site's visible content is coherent with a professional translation provider and shows no login form, sensitive submission form, wallet-connect function, or evident brand-impersonation pattern. However, the assessment identifies a confirmed blacklist hit and multiple external malicious detections, which are material contradictions that outweigh the otherwise benign presentation. No separate identity inconsistency or phishing mechanism was observed in the supplied page content, but the external threat findings warrant a security-forward posture for sensitive interactions.

EVIDENCE

- The homepage presents a service-provider model covering translation, interpretation, localization, communication, and training rather than a financial or credential-harvesting scheme.
- External reputation telemetry records `vt\_malicious: 3`, `vt\_suspicious: 1`, and `external\_blacklist: true`.
- The domain was registered on 2011-09-08 and is recorded as approximately 14.96 years old.

Regulatory Verification Notes

The available website content identifies the operating brand as Maroc Traduction but does not independently establish a legal entity, registration number, or applicable professional authorization. No license is claimed in the supplied business-model evidence; this is a transparency and verification gap rather than, by itself, proof of fraud. The site's stated services include sworn translation and Green Card lottery translation, making confirmation of the relevant service qualifications and commercial identity appropriate before contractual or payment engagement. A separate broker-intelligence dataset recorded no matching broker entry, which provides limited contextual information and is not a licensing determination.

EVIDENCE

- The homepage title and navigation identify "Maroc Traduction" and list translation, interpretation, localization, content-development, marketing, and training services.
- The homepage includes "Traduction Assermentée" and "Traduction de Loterie – Carte Verte" among its service categories.
- The site is hosted on AS21499, identified as GODADDY-SXB - Host Europe GmbH, DE.
- Transport encryption uses a DV certificate issued by YR1, valid through 2026-10-04.

What to Verify Next

Before any sensitive engagement, independently confirm the legal name, physical business details, and authority of the contracting party through an official registry or an independently sourced business channel. Confirm that any sworn-translation or other regulated service is performed by appropriately authorized personnel, and obtain written pricing, scope, delivery, refund, and dispute terms. Contact details should be validated through an offline or independently sourced route, and any payment should use a method that provides commercial dispute protection.

EVIDENCE

- The homepage provides telephone contact channels and an email contact for business and individual customers.
- The supplied page analysis found no sensitive forms, external password submissions, or hidden forms.
- The observed site behavior recorded two successful runs with no external XHR or fetch activity.

Summary Verdict

The overall posture is **low trust**, with elevated risk for sensitive interaction. The coherent business presentation and baseline technical continuity are outweighed by confirmed external reputation contradictions, while the real-

world operator remains unverified. The evidence therefore does not support treating the website as suitable for credential, financial, or other sensitive engagement.

Infrastructure Integrity

The site resolves directly to one likely origin address and is hosted by GODADDY-SXB - Host Europe GmbH, Host Europe GmbH, without a detected CDN or edge-IP layer. This infrastructure is technically identifiable but provides limited protective separation between the public service and its hosting origin; infrastructure characteristics do not mitigate the external reputation concern.

Closing Assessment

Activity should remain limited to non-sensitive browsing until independent identity, authorization, and reputation checks are satisfactorily completed; credentials and financial information should not be submitted.

Written analysis generated 2026-08-19 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine.

- 01 Governance Risk

 - Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
 - The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about maroctraduction.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
