

Is masriera.jp a scam? TrustSniffer's high-risk assessment: 0/100

masriera.jp

Verdict

0

OUT OF 100

CRITICAL RISK

masriera.jp shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Corporate website for Masriera jewellery (Japanese/English) with company information, topics/news, shop locations, access details and contact phone numbers. No obvious forms or financial solicitations on the provided page.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What masriera.jp served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2015.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

Masriera.jp is a Japanese/English corporate website for Masriera jewellery, presenting the brand's history, collections, gallery, topics, company information, shop locations, access details, and telephone contacts; its apparent business model is brand promotion and retail jewellery sales through physical stores and catalogues.

Scam/Impersonation Risk

The site's visible content presents a conventional jewellery-brand profile and contains no login form, credential-collection mechanism, financial solicitation, or clear brand-impersonation indicator. However, this benign presentation is materially contradicted by confirmed external malicious detections and a confirmed blacklist condition, including 11 malicious classifications across the evaluated reputation results. The available evidence does not establish a separate conflicting legal identity, but the external detections are sufficient to make sensitive interaction inappropriate. A contact-channel integrity anomaly is also present: the published address `passeigdegracia@bagues-masriera.come` contains a deliverability-breaking top-level-domain error or possible typosquat.

EVIDENCE

- The homepage and contact/navigation content show corporate jewellery material, telephone numbers, shop information, and no login or sensitive-data form.
- External reputation telemetry records 11 malicious detections, a confirmed blacklist condition, and two tier-one security detections.
- The domain registration record shows creation on 2013-10-18 and an age of 12.85 years.

Regulatory Verification Notes

The company, history, shops, and contact sections provide business-facing information, but the supplied material does not independently verify the real-world operator or establish a licensing or registration basis. No licence claim or licence number is presented in the available business information; for a jewellery retailer this is a disclosure and verification matter rather than, by itself, evidence of misconduct. The available broker-reputation dataset returned no match, which neither validates the operator nor offsets the confirmed external security warnings.

EVIDENCE

- Confirmed technical evidence identifies hosting on AS23824, FUTURE - Future Spirits Co.,Ltd., JP.
- The site uses a DV TLS certificate issued by YR1, valid to 2026-09-29T21:40:47+00:00.
- The company and history sections identify the Masriera brand and business activities but do not provide an independently verified legal-entity or licence reference in the supplied content.

What to Verify Next

Before any account, payment, or other sensitive interaction, the operator should be matched independently to an official corporate registry and to the jewellery brand's verified offline presence. Contact routes should be confirmed through an independently sourced Masriera channel rather than relying solely on the website. Any applicable retail, import, consumer-protection, or other regulatory obligations should also be checked with the relevant authority, and the site's current security reputation should be re-evaluated before engagement.

EVIDENCE

- The company and shops pages provide the identity and location references that should be matched against independent corporate and retail records.
- The contact and access pages provide telephone and physical-location details suitable for an offline confirmation.
- The available disclosure material does not include a licence number or independently verifiable operator reference.

Summary Verdict

The overall posture is **critical risk for sensitive interaction**. Although the website presents a coherent corporate-brand experience, the confirmed external malicious and blacklist findings decisively outweigh the otherwise conventional page content, and the operator's real-world identity remains unverified.

Infrastructure Integrity

The site resolves directly to infrastructure operated by FUTURE - Future Spirits Co.,Ltd. in Japan, without a detected CDN or WAF layer and with a likely origin endpoint exposed. The transport encryption is a mitigating technical control, but it does not neutralize the external reputation risk.

EVIDENCE

- The resolved server IP is 219.99.172.158.
- Infrastructure telemetry reports unique IP count 1, edge IP count 0, and likely origin IP count 1.
- The TLS certificate is DV-validated, issued by YR1, and expires on 2026-09-29T21:40:47+00:00.

Closing Assessment

Passive viewing is the proportionate limit of activity at present; account access, credential submission, payments, and other sensitive actions should be deferred until independent identity and security validation is completed.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of masriera.jp.

- The request stayed on masriera.jp. It was not redirected to another domain. CLEAR
- DNS for this domain is served by asp-frontier.net, across 3 name servers. NOTED
- The registration is paid up to 2026-10-31. NOTED
- The earliest public archive of this site is from 2015-08-01. CLEAR
- It is hosted on FUTURE, from a server in JP. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about masriera.jp at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
