

Is masterplasticpack.com safe? TrustSniffer's low-trust assessment: 25/100

masterplasticpack.com

Verdict

25

OUT OF 100

LOW TRUST

masterplasticpack.com is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-09-22 by automated analysis. Classification confidence 55%.

What this site appears to be

Company site for Master Plastic Pack, a packaging and printing manufacturer established in 2004 in Gujranwala, Pakistan. Describes capabilities, monthly production capacities, industries served, contact details, and invites quote requests.

Compromised host notice

A threat-intelligence feed listed a file on masterplasticpack.com as hosting scam content (last seen 2026-09-22). TrustSniffer's evidence indicates that the site itself was compromised: the listing concerns a file placed on it by someone else, and the site's owner is most likely a victim, not the actor.

Until the file is removed, downloading anything from this site is not safe. If you run this site, remove the listed file, update the site software and its plugins, change its passwords and review it for other unauthorized changes.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

The page as captured

https://masterplasticpack.com/

What masterplasticpack.com served when TrustSniffer captured it on 2026-09-22. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2024.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

Master Plastic Pack is a corporate B2B website presenting a Gujranwala, Pakistan-based printing and packaging manufacturer that offers flexible packaging, cartons, labels, rotogravure printing, production-capacity information, portfolio material, and quote requests for brands and distributors.

Scam/Impersonation Risk

The site's content presents a coherent manufacturing business and does not show a login form, credential-harvesting mechanism, or detected brand impersonation. However, this positive page-level presentation is outweighed by confirmed external threat detections: reputation telemetry recorded five malicious detections and a blacklist hit from two external sources. The available evidence therefore supports a **high-risk assessment for sensitive interaction**, even though no conflicting legal-entity names or explicit impersonation indicators were identified.

EVIDENCE

- The homepage describes Master Plastic Pack as a packaging manufacturer established in 2004 in Gujranwala, Pakistan and invites quotation requests.
- External reputation telemetry recorded 5 malicious detections and a confirmed blacklist status.
- The domain was registered on 2023-08-18 and is approximately 3.1 years old; the registrar is TuringSign Inc. d/b/a Cosmotown.
- The homepage and observed site behavior showed no login form, hidden sensitive form, wallet connection, or external password submission.

Regulatory Verification Notes

The site provides a business name, location, telephone contact, company history, production capabilities, and a commercial quote-request model. It does not claim a regulatory license or provide a license number, and the available evidence does not establish regulated-entity status; this is a disclosure and verification gap rather than, by itself, proof of fraud. The site's apparent business model is ordinary manufacturing, but the confirmed external blacklist signal materially limits the weight that can be placed on its otherwise coherent corporate presentation. Transport security is present, but domain-validation TLS confirms encrypted connection rather than operator identity.

EVIDENCE

- The homepage and About content identify Master Plastic Pack, state "since 2004," and locate the business in Gujranwala, Pakistan.
- The site presents flexible packaging, HD cartons, labels, and rotogravure production as commercial services rather than financial products.
- The site does not display a claimed license authority or registration number in the supplied page content.
- The site is served from AS24940, HETZNER-AS - Hetzner Online GmbH, DE; its TLS certificate is issued by YR1 at DV validation level and is valid to 2026-11-21.

What to Verify Next

Before any commercial engagement, the proposed counterparty should be confirmed through an independently sourced business registry, physical-site contact, or established industry reference rather than relying solely on the website. Any quotation, invoice, bank instruction, or payment request should be validated through a separately obtained telephone number and matched against independently confirmed company details. The organization's official support and contact channels should also be confirmed through an offline or independently sourced route.

EVIDENCE

- The Contact and homepage content provide the primary business contact details used for quotation requests.
- The site's stated manufacturing capabilities and company history should be matched against independently obtained corporate or trade documentation.
- The confirmed external reputation warning warrants independent validation before financial commitment or exchange of sensitive business information.

Summary Verdict

The overall posture is **low trust with elevated risk for sensitive interaction**. The website appears to represent a plausible B2B manufacturing operation, but confirmed external threat detections and blacklist status create a material contradiction that prevents the site from being treated as dependable for credentials, payments, or other consequential transactions.

Infrastructure Integrity

The website is protected by a CDN/WAF arrangement, and the analysis observed only an edge-facing address rather than a directly exposed origin. This reduces some direct infrastructure-exposure risk but is only a mitigating technical control; it does not resolve the external reputation concerns or establish the operator's identity.

EVIDENCE

- CDN/WAF protection was detected for the website.
- One observed edge address was associated with AS24940 and Hetzner Online GmbH in Germany.
- The origin server was not observable in the infrastructure analysis.

Closing Assessment

The appropriate posture is to avoid credentials, payment activity, and other sensitive exchanges until the counterparty and transaction instructions have been independently validated.

Written analysis generated 2026-09-22 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	LIKELY
Identity score	73/100
Identity verification confidence	74%

- Trusted social count=1

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of masterplasticpack.com.

- The request stayed on masterplasticpack.com. It was not redirected to another domain. CLEAR
- Registration is published under TuringSign Inc. d/b/a Cosmotown. CLEAR
- DNS for this domain is served by webcane.com, across 2 name servers. NOTED
- The registration is paid up to 2027-08-18. NOTED
- The earliest public archive of this site is from 2024-12-27. CLEAR
- It is hosted on HETZNER-AS, from a server in DE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about masterplasticpack.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
