## Full analysis

### Overview

Maxbuy is a Ghana-focused electronics e-commerce website offering smartphones, televisions, household and kitchen appliances, audio equipment, and accessories at Ghana-cedi prices, with conventional shopping, store-location, preorder, and order-tracking functions.

### Scam/Impersonation Risk

No identity contradictions, phishing behavior, brand impersonation, or deceptive financial solicitations were observed. The retail catalogue, localized pricing, product identifiers, discounts, and fulfilment-oriented navigation form a coherent commercial proposition. This conclusion is reinforced by a multi-year domain registration, continuous archived activity without evidence of repurposing, and clean external threat-reputation results.

- The homepage presents detailed retail inventory, Ghana-cedi pricing, SKUs, cart actions, store-location navigation, and order tracking.
- The domain registration record identifies Kojo Djan Jnr and Maxbuy Ghana Limited; registered 2021-03-29 (~5.34 years old), with expiry on 2028-03-29.
- The historical record contains 31 archive snapshots spanning 2024-08-28 to 2026-04-22 (3 years tracked), with no detected semantic drift or suspicious repurposing.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no search-safety malicious finding, no external threat listing, and 0 abuse reports.

### Regulatory Verification Notes

The observed business model is ordinary consumer-electronics retail rather than investment, brokerage, cryptocurrency, or other regulated financial activity. The supplied homepage content does not establish detailed corporate-registration, warranty, returns, privacy, or checkout terms; this is a limited disclosure-verification note, not evidence of illegitimacy. No broker-profile match was identified, but that third-party result has no meaningful bearing on an electronics retailer's legal status.

- The homepage describes direct consumer sales of discounted and preorder electronics rather than financial or investment services.
- The homepage navigation exposes About and Contact Us destinations, while the supplied text does not contain their substantive legal or policy disclosures.

- The registration record names Ghana Dot Com as registrar and Maxbuy Ghana Limited as the registrant organization.
- The available third-party broker dataset contains no matched profile for the site.

**What to Verify Next**

For higher-value purchases or enterprise procurement, the purchaser should review the final checkout total, delivery arrangements, warranty coverage, return rights, and payment recipient before authorizing payment. Corporate buyers should additionally reconcile the invoicing entity with the named registrant organization and confirm official contact channels through an independent business directory or offline route.

- The homepage includes discounted and preorder merchandise, making fulfilment timing and return conditions relevant at the point of purchase.
- Store-location and order-tracking functions provide practical channels through which fulfilment details can be cross-checked.
- Product pages expose prices and SKUs, enabling purchase orders and invoices to be reconciled against the selected merchandise.

**Summary Verdict**

The website is a legitimate, established, and trustworthy retail operation with a coherent commercial identity and no observed contradictory threat signals. Normal interaction, including account login, ordinary shopping functions, and standard transactions, is appropriate.

**Infrastructure Integrity**

The site uses Cloudflare CDN/WAF protection, with all observed addresses operating as edge infrastructure and no origin candidate exposed during the analysis. This reduces direct infrastructure exposure but is treated as a security control rather than independent proof of legitimacy.

- The hosting infrastructure is served from AS47583 (Hostinger International Limited), with observed hosting in Germany.
- The site's transport encryption uses a valid YR2-issued domain-validation certificate, valid to 2026-09-30.
- Two Cloudflare edge addresses were observed, one IPv4 and one IPv6, with no likely origin address identified.

**Closing Assessment**

Prospective customers may use the site normally, applying routine e-commerce and procurement controls appropriate to the value and fulfilment complexity of the transaction.

### About this assessment

A trust score summarises the evidence TrustSniffer could collect about maxbuy.com.gh at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
