Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2009.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Mayhem Entertainment is a Rhodes-based local entertainment and event-services website presenting karaoke shows, live music, wedding and party entertainment, and hire of sound, lighting, and special-effects equipment; its apparent business model is to generate bookings and rental engagements through site enquiries.

Scam/Impersonation Risk

No contradictions were observed across the site's identity, content, behavioural, and external-reputation signals. The homepage and service pages describe a coherent local entertainment offering, with no phishing indicators, login forms, wallet-connect functions, hidden sensitive forms, or brand-impersonation signals detected. The site's historical record is consistent with an established web presence rather than a recently created or suspiciously repurposed domain. Available external checks recorded no malicious or suspicious result, although reputation coverage was partial; this supports a low scam/impersonation concern without independently proving the operator's real-world identity.

EVIDENCE

- Homepage: identifies Mayhem Entertainment in Rhodes and presents karaoke, music shows, and event equipment hire for parties, weddings, and larger events.
- Site behaviour: two successful runs showed no login form, hidden form, wallet connection, clipboard manipulation, cloaking, or suspicious inline script.
- Domain registration: registered 2009-02-23; approximately 17.5 years old.
- Web archive: 107 snapshots spanning 2009–2025, with 17 years tracked.

Regulatory Verification Notes

The website operates as an entertainment and equipment-rental service rather than presenting itself as a regulated financial or investment provider. Its Terms and Conditions and Contact pages provide places to review contractual and contact information, but the supplied pages do not state a licensing authority or registration number; for this type of local service, that is a transparency item to resolve where legally relevant, not evidence of a scam. The operator identity remains only likely rather than independently verified, so the site's own business presentation should not be treated as conclusive proof of the contracting entity. No matching third-party broker record was identified.

EVIDENCE

- Terms and Conditions page: provides contractual terms but no licensing authority or licence number is stated in the supplied content.
- Contact page: is presented as the route for enquiries and bookings, supporting a conventional service-business model.
- Hosting: served from AS54290, HOSTWINDS - Hostwinds LLC., US.
- Transport security: TLS certificate issued by YR2 with DV validation, valid to 2026-10-23 07:13:43 UTC.

What to Verify Next

Before a booking or payment, the contracting party should be confirmed through an independently sourced business or venue reference, and the quotation or invoice should identify the responsible person or entity. The booking terms should be reviewed for cancellation, refund, equipment-liability, and event-failure provisions, with payment made through a method offering appropriate transaction protection. Official contact channels should also be confirmed through an independent route before sensitive information or funds are exchanged.

EVIDENCE

- Contact page: use the published booking route as the starting point for confirming the responsible contracting party.
- Terms and Conditions page: review the contractual basis for bookings, cancellations, refunds, and equipment hire.
- Service pages: compare the requested quotation with the advertised entertainment and rental services before committing.

Summary Verdict

The overall posture is **high trust and low risk**, and the available evidence is consistent with an established, apparently legitimate local services website. The absence of observed contradictions supports normal browsing and ordinary commercial engagement, while the independent operator-identity uncertainty prevents treating the business identity as proven.

Infrastructure Integrity

The site resolves directly to a single likely origin address, with no CDN or WAF detected. This provides a straightforward hosting path but lacks the additional edge-layer mitigation that a CDN or WAF can provide; infrastructure therefore offers limited mitigation and should not be treated as proof of legitimacy.

EVIDENCE

- Hosting resolution: one resolved address, 23.254.226.12, in the United States.
- Infrastructure posture: zero edge IPs and one likely origin IP were identified; no CDN vendors were detected.

Closing Assessment

The site is suitable for ordinary service research and booking consideration, subject to routine independent confirmation of the contracting party, contractual terms, and payment protections before a financial commitment.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	40%

- Trusted social count=5

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of mayhementertainment.net.

- The request stayed on mayhementertainment.net. It was not redirected to another domain. CLEAR
- Registration is published under ENOM, INC.. CLEAR
- DNS for this domain is served by hostwindsdns.com, across 2 name servers. NOTED
- The registration is paid up to 2027-02-23. NOTED
- The earliest public archive of this site is from 2009-08-31. CLEAR
- It is hosted on HOSTWINDS, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about mayhementertainment.net at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
