

Is mb-egypt.com safe? TrustSniffer's low-trust assessment: 40/100

mb-egypt.com

Verdict

40

OUT OF 100

LOW TRUST

mb-egypt.com is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-19 by automated analysis. Classification confidence 55%.

What this site appears to be

Very short page fragment titled 'MB Group' with repeated 'Visit Us' lines. No forms, links, or claims present.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The page as captured

<https://mb-egypt.com/>

What mb-egypt.com served when TrustSniffer captured it on 2026-08-19. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2009.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

The website is a very short corporate/contact page presented under the name “MB Group,” with repeated “Visit Us” messaging and no evident transactional, financial, or account-based business model on the captured homepage.

Scam/Impersonation Risk

The site presents limited content and no visible forms, links, or substantive claims, so the page itself does not demonstrate a conventional impersonation flow. However, external threat intelligence records a confirmed blacklist hit and two malicious detections for the domain. These are material contradictions that outweigh the otherwise benign presentation of the homepage and support a clearly cautionary posture for sensitive interaction. No conflicting legal-entity names or direct brand-impersonation indicators were observed in the supplied page content.

EVIDENCE

- Homepage: the page contains only “MB Group” and repeated “Visit Us” text, with no forms, links, or business claims.
- External reputation: the domain has a confirmed blacklist status and 2 malicious detections among 2 suspicious/malicious findings.
- Domain registration: registered 2007-05-02 and approximately 19.31 years old.
- Archive record: 63 snapshots spanning 2009–2025, covering 17 tracked years.

Regulatory Verification Notes

The available page content does not independently establish the real-world operator behind “MB Group.” It also does not state a licensing authority, registration number, or other regulatory authorization. That omission is a disclosure and verification gap rather than, by itself, proof of fraud; nevertheless, the absence of identifiable legal and regulatory substance is significant when considered alongside the external threat findings. The site uses domain-validated transport encryption, which confirms encrypted transmission but does not validate the operator or its business status.

EVIDENCE

- Homepage: identifies the subject only as “MB Group” and provides repeated “Visit Us” messaging.
- Homepage: no licensing authority, registration number, or regulatory authorization is stated.
- TLS certificate: DV validation, issuer YR2, valid to 2026-09-29T23:28:58+00:00.

What to Verify Next

Before any sensitive engagement, an independent corporate-registry check should establish which legal entity, if any, operates under the “MB Group” name. If the proposed interaction involves a regulated service, the relevant regulator’s public register should be checked for the entity and activity concerned. Official contact channels should also be confirmed through an independent, offline route rather than relying solely on information presented by the site.

EVIDENCE

- Identity verification: the captured homepage supplies only the name “MB Group,” requiring independent entity mapping.
- Regulatory verification: the site provides no stated authority or registration number against which authorization can be directly matched.
- Contact validation: the page provides visit/contact-oriented messaging but does not supply a broader independently corroborated corporate profile.

Summary Verdict

The overall posture is low trust, with elevated risk associated with sensitive interaction. The available evidence is insufficient to treat the site as an independently verified counterparty, and the adverse external findings constitute a material reason for that conclusion. The benign appearance of the captured page does not resolve the broader trust concern.

Infrastructure Integrity

Hosting resolves directly through Oracle Corporation infrastructure rather than a detected CDN or edge-IP layer. This provides identifiable hosting context but does not supply a meaningful protective legitimacy signal.

EVIDENCE

- Hosting infrastructure: served from AS31898, ORACLE-BMC-31898 — Oracle Corporation, US.
- Network posture: 2 unique IPs were identified, with 0 edge IPs and 2 likely origin IPs; no CDN was detected.

Closing Assessment

Sensitive activity should remain suspended until the operator’s identity, applicable authorization, and official communication channels have been independently validated; credentials and financial information should not be submitted in the interim.

Written analysis generated 2026-08-19 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE
- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat
- The page made background requests to destinations TrustSniffer does not recognise.

Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_XHR
- A large share of what the page loaded came from other domains.

Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_MODERATE
- The page exchanged network traffic with destinations TrustSniffer does not recognise.

Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_TRAFFIC

Identity verification

Status	UNVERIFIED
Identity score	30/100

Identity verification confidence	25%
----------------------------------	-----

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of mb-egypt.com.

- The request stayed on mb-egypt.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by websitewelcome.com, across 2 name servers. NOTED
- The registration is paid up to 2027-05-02. NOTED
- The earliest public archive of this site is from 2009-04-16. CLEAR
- It is hosted on ORACLE-BMC-31898, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about mb-egypt.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
