- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2001.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

What presents itself as a Polish retail and corporate banking website, mBank.pl provides visitors with information about banking products, digital services, promotions, security guidance, and customer-support access for individuals and businesses.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, malicious-content, or identity-contradiction signals were observed. The site's Polish-language presentation is internally coherent with a corporate banking model, and the homepage content includes security guidance, customer-support navigation, and ordinary banking-service pathways rather than deceptive investment or credential-harvesting mechanisms. Available evidence is therefore consistent with an established, apparently legitimate website, although the real-world operator identity is not independently verified.

EVIDENCE

- The homepage and individual-customer pages present coherent corporate-bank content, including account access, security information, promotions, and support navigation, with no reported red flags.
- Page and behavior observations recorded no login form, hidden form, external password destination, wallet activity, cloaking, suspicious inline script, or clipboard-hijacking behavior.
- External reputation evaluation recorded 0 malicious detections, 0 suspicious detections, and no blacklist or malicious-search result.

Regulatory Verification Notes

The site presents a conventional retail and corporate banking business model, including accounts, debit and credit cards, savings and deposits, loans, insurance, mobile banking, and branch-related services. The available page evidence does not show a claimed license number or an on-page regulatory authorization disclosure; this is a transparency point requiring independent confirmation, not evidence of a scam. A separate broker-information dataset associates the domain with mBank S.A. in Poland and reports "No Regulation" with no license found, but this is a limited third-party reputational signal rather than a legal or regulatory determination. The site's long operating history, sustained archival presence, professional banking content, clean external reputation, and strong global traffic footprint materially support an established-site assessment, while the operator's real-world identity remains independently unverified.

EVIDENCE

- Domain registered through Domena.pl sp. z o.o. on 2000-08-08 and recorded as 26.03 years old, expiring 2027-08-07.
- Web-archive records show 181 snapshots spanning 2001-07-20 through 2025-11-05, covering 25 tracked years.
- The site's transport encryption uses an EV certificate issued by DigiCert EV RSA CA G2 for mBank S.A., valid through 2027-01-22.
- Technical hosting evidence identifies AS8075, Microsoft Corporation, US.

What to Verify Next

Before credential or payment interactions, an institution should independently confirm the applicable banking authorization through the relevant Polish regulatory register and confirm that the legal entity named there corresponds to the intended service. Standard checks should also include confirming the official support and contact channels through an independent route, reviewing current account terms and promotional conditions, and ensuring that payment protection and dispute mechanisms are available for any transaction.

EVIDENCE

- The site's content is categorized as banking and financial marketing for retail and corporate customers, with support and security sections available.
- The page capture completed successfully with HTTP 200 behavior and no sensitive form or untrusted-destination finding.
- The site describes mobile-app guidance and digital banking services, making independent confirmation of the official application channel appropriate before installation.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate, low-risk website and supports a high-trust posture. No contradictory scam or impersonation indicators were identified, but the available evidence does not independently prove the real-world operator identity.

Infrastructure Integrity

The website is protected by CDN/WAF infrastructure, providing a mitigating layer against direct exposure and common web abuse. Infrastructure resolution records MBANK-SA / mBank S.A. on AS16167 in Poland, with an observed edge server at 188.40.168.204 on AS24940; these protective arrangements support resilience but do not independently establish legitimacy.

EVIDENCE

- Infrastructure resolution reports 3 unique IPs, including 1 edge IP and 2 potential origin candidates.
- Hosting infrastructure is recorded as MBANK-SA — MBANK S.A., PL, on AS16167.
- The observed CDN edge IP is 188.40.168.204 on AS24940.

Closing Assessment

Normal browsing and ordinary banking-site interaction are proportionate to the available low-risk assessment, while independent confirmation of merchant identity, authorization, terms, and payment protections should precede credential submission or financial transactions.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of mbank.pl.

- The request stayed on mbank.pl. It was not redirected to another domain. CLEAR
- Registration is published under Domena.pl sp. z o.o.. CLEAR
- DNS for this domain is served by akam.net, across 4 name servers. NOTED
- The registration is paid up to 2027-08-07. NOTED
- The earliest public archive of this site is from 2001-07-20. CLEAR
- It is hosted on MICROSOFT-CORP-MSN-AS-BLOCK, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about mbank.pl at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
