Full analysis

Overview

Mbizmarket is an established Indonesian B2B marketplace and e-procurement platform that connects organizational buyers with regional vendors, publishes product and seller information, supports procurement workflows and payment arrangements, and facilitates access to third-party business financing.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, or malicious behavior were observed. The marketplace content is commercially coherent: named sellers, Indonesian rupiah pricing, procurement guidance, policies, company news, and institutional-collaboration claims collectively align with the stated business purpose. A long-established domain, continuous archival presence, meaningful global traffic footprint, and clean external reputation further support the conclusion that this is a legitimate operating website rather than a recently created imitation.

- The homepage identifies itself as “B2B Marketplace - Mbizmarket Solusi Pengadaan Perusahaan No 1” and displays named vendors, product categories, prices, seller locations, and business-scale information.
- The domain was registered on 13 September 2018 and is approximately 7.89 years old; registration extends to 13 September 2031.
- Public web archives contain 84 snapshots spanning 24 June 2019 to 7 June 2026, covering 8 tracked years without suspicious repurposing or detected semantic drift.
- External reputation telemetry recorded 0 malicious and 0 suspicious detections, no search-browser safety hit, no abuse reports, and a global traffic rank of 66,356.

Regulatory Verification Notes

The supplied website material presents transaction guides, policies, contact details, and institutional-collaboration claims, but it does not establish a specific corporate registration or regulatory licence. This is a limited disclosure point rather than evidence of deception: a general B2B marketplace is not inherently equivalent to a regulated financial institution, while financing and payment arrangements may involve separate providers and contractual obligations. No matched broker-reputation record was identified, which neither confirms nor challenges the platform's legal standing.

- The homepage presents procurement, payment-term, and business-financing services but supplies no identified licence authority or licence number in the assessed content.
- The homepage includes transaction guidance and policy references, demonstrating an operational commerce framework.

- The domain is registered through PT Web Commerce Communications.
- The site uses a DV TLS certificate issued by Sectigo Public Server Authentication CA DV R36, valid until 21 November 2026.

What to Verify Next

Prospective organizational customers should confirm the contracting entity’s registered name and business-registration details against the applicable Indonesian registry. Procurement teams should also review seller qualification controls, transaction terms, dispute procedures, and the identity and authorization of any financing or payment provider before approving material commitments.

- The homepage’s named-seller listings provide reference points for independent vendor due diligence.
- The published transaction guides and policies provide the source documents for reviewing payment, fulfilment, cancellation, and dispute responsibilities.
- The institutional-collaboration claims displayed on the homepage can be corroborated directly with the named counterparties.
- The site’s published telephone and contact channels provide a basis for confirming official communications through an independently sourced route.

Summary Verdict

Mbizmarket presents as a legitimate, established, and trustworthy commercial website. Its coherent marketplace content, sustained operating history, clean reputation, and absence of contradictory fraud signals support normal interaction, including account login and standard platform use.

Infrastructure Integrity

The website is served from AS19551 by Incapsula Inc. in the United States and is protected by Incapsula's CDN/WAF. Both observed addresses were edge servers, with the origin shielded from direct observation; this reduces direct infrastructure exposure but is a protective control rather than independent proof of legitimacy.

- The hosting infrastructure serves the site from AS19551 (Incapsula Inc., US).
- Two CDN edge addresses were observed, both within AS19551, with no origin-server candidate exposed.
- Transport encryption uses a valid Sectigo-issued DV certificate.

Closing Assessment

Normal account access and standard transactions are appropriate, subject to routine organizational procurement, counterparty, and contractual due diligence.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about mbizmarket.co.id at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
