No screenshot is retained for this report.

## Key findings

- Automated classification: Safe for Read-Only.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2025.
- No flags from the reputation services TrustSniffer consulted at assessment time.

## Full analysis

### Overview

MCM Business Tech-Co presents itself as a Mexican B2B technology and telecommunications provider offering enterprise connectivity, cybersecurity, cloud, data-center, communications, physical-security, and managed-infrastructure services through business contracts and service subscriptions.

### Scam/Impersonation Risk

No contradictions were observed across the site’s identity, content, behavioral, and reputation signals. The homepage presents a conventional corporate-services model, with detailed service categories, industry coverage, contact information, policies, and customer case studies; it does not display phishing forms, credential harvesting, deceptive financial claims, or brand-impersonation indicators. External screening found no malicious or suspicious detections, and the site’s observed behavior showed no cloaking, hidden forms, wallet activity, clipboard manipulation, or suspicious scripts.

EVIDENCE

- The homepage identifies MCM Business Tech-Co and describes enterprise connectivity, cybersecurity, cloud, data-center, communications, and physical-security services.
- The homepage contains approximately 18,622 characters of substantive business content and no login or sensitive-data form.
- The domain was registered in 2024 and is approximately 1.8 years old; archival records show 52 snapshots across 2025–2026, covering 2 tracked years.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and 0 abuse reports.

### Regulatory Verification Notes

The site presents identifiable business locations, contact channels, policies, industry sectors, and customer case studies, supporting a coherent corporate identity. Its pages do not state a license, registration number, or sector-specific regulatory authorization; this is a transparency item requiring confirmation where a proposed service falls within a regulated activity. A separate broker-reputation comparison produced no match and therefore adds no adverse conclusion.

#### EVIDENCE

- The homepage links to “Nosotros,” “Casos de éxito,” “Cobertura,” “Recursos,” “Bolsa de trabajo,” and “Contacto” sections.
- The site’s transport encryption is a valid DV TLS certificate issued by WE1, expiring 2026-10-12.
- The domain registrar is Amazon Registrar, Inc.; registration dates are 2024-10-14 to 2026-10-14.
- The site is hosted on AS209242, identified as CLOUDFLARESPECTRUM – Cloudflare London, LLC, US.

#### What to Verify Next

Before any high-value or sensitive commercial engagement, confirm the applicable corporate or sector authorization through the relevant Mexican registry and validate the proposed contracting entity using independently sourced corporate contact details. Confirm that quotations, invoices, and payment instructions correspond to the verified entity and agreed service scope.

#### EVIDENCE

- The homepage describes services spanning telecommunications, cybersecurity, cloud, data centers, and physical security.
- The site provides contact and policy sections that can be cross-checked against independent corporate records.
- The business model is presented as enterprise service contracts and subscriptions rather than consumer investment or financial-return products.

#### Summary Verdict

The website has a moderate, evidence-supported trust posture. Its coherent corporate presentation, substantive service content, clean observed behavior, and absence of contradiction or malicious-reputation signals support ordinary browsing and routine business engagement, while the relatively recent domain history and unresolved regulatory-disclosure question limit confidence for high-value commitments.

#### Infrastructure Integrity

The site benefits from Cloudflare CDN/WAF edge protection, with observed traffic terminating on CDN infrastructure and no origin candidate identified. This reduces direct exposure of the hosting environment but is a mitigating control rather than proof of legitimacy.

#### Closing Assessment

Routine engagement is reasonable, with independent entity and authorization checks completed before sensitive data exchange, binding commitments, or substantial payments.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

#### What the analysis found

No rule findings contributed to this verdict.

## Identity verification

|                                  |            |
|----------------------------------|------------|
| Status                           | UNVERIFIED |
| Identity score                   | 30/100     |
| Identity verification confidence | 50%        |

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

## What TrustSniffer observed

First-party facts recorded during the assessment of mcmtechco.com.

- The request stayed on mcmtechco.com. It was not redirected to another domain. CLEAR
- Registration is published under Amazon Registrar, Inc.. CLEAR
- DNS for this domain is served by awsdns-01.org, across 4 name servers. NOTED
- The registration is paid up to 2026-10-14. NOTED
- The earliest public archive of this site is from 2025-02-07. CLEAR
- It is hosted on CLOUDFLARESPECTRUM, from a server in US. NOTED

## About this assessment

A trust score summarises the evidence TrustSniffer could collect about mcmtechco.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a

legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
