- Public web-archive history exists since 2006.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Mecca Mall is an official-looking shopping mall directory and promotional website for a retail and dining complex in Amman, Jordan, presenting store and restaurant listings, service categories, contact details, working hours, tenant information, and an associated app promotion.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, or other contradictory signals were observed. The homepage presents a coherent retail-directory purpose rather than an anomalous financial or investment solicitation, and its login/registration form was not identified as a sensitive or externally submitted credential form. Available reputation checks found no malicious or suspicious detections, although coverage was partial; this supports a low scam and impersonation risk rather than proving the real-world operator identity.

EVIDENCE

- The homepage is classified as a retail/shopping mall directory and contains store, restaurant, service, contact, and app-promotion content; no page-level red flags were identified.
- The homepage contains one login/registration form, with no sensitive form, hidden form, external password destination, wallet connection, or credential-draining behavior detected.
- Domain continuity evidence records an age of 20.36 years, with no suspicious repurposing or semantic drift identified.
- The historical record contains 205 snapshots from 2006-04-11 through 2025-11-22, spanning 20 tracked years.

Regulatory Verification Notes

The site appears to operate as a commercial mall directory and promotional channel, with a business model based on tenant listings, advertising, space bookings, and app promotion rather than a financial service. No regulatory license claim or license number is presented in the supplied site content; for this business model, that is best treated as a disclosure and verification point rather than evidence of wrongdoing. The site provides a Jordanian telephone contact and a published organisational email address, while the available identity evidence remains consistent with—but does not independently prove—the real-world operator. No matching broker-reputation record was identified.

EVIDENCE

- The homepage lists retail, dining, entertainment, medical, pharmacy, financial-service, and other tenant categories, consistent with a mall-directory business.
- The homepage publishes the telephone number “(+962 6)5527948” and the email address “info@kurdigroup.jo”.
- The hosting infrastructure is identified as AS142594, SPEEDYPAGELTD-AS-AP – SpeedyPage Ltd, AU.
- The site uses a valid DV TLS certificate issued by YR2, valid to 2026-10-01T11:54:54+00:00.

What to Verify Next

Before credential or payment interactions, independently confirm that the site is the current official digital channel of Mecca Mall and that the listed operator is authorised to represent the mall and its tenants. Any tenant purchase should be assessed against that tenant’s own return, refund, and payment-protection terms, and the associated app should be obtained only through an independently confirmed official distribution channel. Where a regulated service is offered by a tenant, licensing should be checked with the relevant Jordanian registry rather than inferred from the mall directory.

EVIDENCE

- The homepage links to social profiles on Facebook, YouTube, Instagram, and TikTok, which can be cross-checked through independently established mall channels.
- The homepage contains a single login/registration form but no sensitive-form or untrusted-destination finding.
- The supplied content identifies the site as a promotional directory for tenants and app activity, not as a licensed financial-services platform.

Summary Verdict

The overall posture is **high trust and low risk**, and the available evidence is consistent with an established, apparently legitimate website. No scam or impersonation contradictions were observed, but the real-world operator connection remains likely rather than independently verified.

Infrastructure Integrity

The site resolves directly to one identified IP address, with no CDN or WAF detected and one likely origin address observed. This provides less edge-layer protection than a site behind mainstream CDN infrastructure, but the infrastructure finding is a technical mitigating-context issue rather than an indication of malicious activity.

Closing Assessment

Normal browsing is proportionate to the assessed posture; before submitting credentials or making payments, ordinary independent checks of merchant identity, applicable return terms, and payment protections should be completed.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	78%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of meccamall.jo.

- The request stayed on meccamall.jo. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2006-04-11. CLEAR

About this assessment

A trust score summarises the evidence TrustSniffer could collect about meccamall.jo at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
