

Is mecshopping.it legit? TrustSniffer's high-trust assessment: 80/100

mecshopping.it

Verdict

80
OUT OF 100

HIGH TRUST

mecshopping.it appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 75%.

What this site appears to be

Italian online clothing retailer (Mec Shopping) with cookie/consent UI, many third-party trackers and standard payment integrations (Stripe, PayPal, Klarna). Content and structure align with a normal ecommerce storefront.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2014.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is an Italian online clothing retailer presenting fashion, apparel, footwear, and accessories through a conventional ecommerce storefront. Its apparent business model is direct product sales supported by online checkout and standard payment services, with marketing and analytics functionality integrated into the visitor experience.

Scam/Impersonation Risk

No contradictions were observed. The available evidence does not indicate phishing, brand impersonation, blacklist placement, malicious behavior, or an identity inconsistency. The storefront structure, product presentation, and checkout model are consistent with ordinary ecommerce activity; the absence of sensitive forms during observation further reduces concern about credential harvesting. A long-established registration history, sustained archival continuity, clean external reputation signals, and an established traffic footprint provide converging support for an apparently legitimate site, although the real-world operator identity remains likely rather than independently verified.

EVIDENCE

- Domain registration records show creation on 2010-05-23 and an age of 16.23 years.
- Web archives contain 221 snapshots spanning 2014-06-30 to 2026-03-15, covering 13 tracked years.
- The homepage is classified as an ecommerce shop with no identified phishing, impersonation, or other page-level red flags.
- External reputation checks recorded zero malicious and zero suspicious detections, with no blacklist or abuse reports identified.

Regulatory Verification Notes

The site presents a consumer-retail business rather than a regulated financial service, and no regulated-service license claim or license number is identified in the supplied page evidence. This is a disclosure and verification point, not evidence of fraudulent conduct. Registration records list Mec Shopping S.r.l. and Neen S.p.a. as the registrar, which supports an identifiable commercial context, but the operator connection should still be treated as apparent rather than proven independently. The cookie-consent interface states that information may be shared with advertising, analytics, and social-media partners, and visible payment integrations include Stripe, PayPal, and Klarna; these are ordinary ecommerce mechanisms but warrant review of privacy, returns, and payment terms.

EVIDENCE

- Registration records list Mec Shopping S.r.l. as the owner and organization, with Neen S.p.a. as registrar.
- The site is served from AS13335, operated by CLOUDFLARENET - Cloudflare, Inc., US.
- The transport certificate is issued by WE1, uses DV validation, and is valid to 2026-10-27.
- The homepage displays cookie categories for necessary, preferences, statistics, and marketing purposes and identifies sharing with analytics, advertising, and social-media partners.

What to Verify Next

Before credential or payment interactions, the prospective user should independently confirm the merchant identity shown in the legal and terms materials, review the applicable return, refund, delivery, and dispute provisions, and ensure that checkout remains within the expected payment flow. Licensing verification is relevant only if the site later presents a regulated service or financial product. Contact channels should be confirmed through an independently sourced route rather than relying solely on information encountered during browsing.

EVIDENCE

- Legal and terms pages should be checked for consistency between the merchant name, trading details, returns process, and payment obligations.
- The checkout and payment-protection terms should be reviewed before any transaction is authorised.
- An independently sourced contact route should be used to validate support and fulfilment arrangements.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture for its stated retail function. The conclusion is strong at the website-risk level, while independent verification of the real-world operator remains incomplete.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, and the observed addresses are CDN edge addresses rather than a directly exposed origin. This provides a meaningful exposure-reduction measure, but protective hosting remains a mitigating control rather than proof of legitimacy.

EVIDENCE

- Observed edge addresses were 104.26.2.176, 104.26.3.176, 172.67.69.126, and 2606:4700:20::681a:2b0.
- The infrastructure record identifies Cloudflare as the CDN/WAF provider and reports six edge addresses with zero origin candidates.

Closing Assessment

Ordinary browsing is proportionate to the assessed posture; credential or payment use should follow routine independent merchant-identity, return-policy, and payment-protection checks.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	73/100
Identity verification confidence	74%

- Trusted social count=1

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of mecshopping.it.

- The request stayed on mecshopping.it. It was not redirected to another domain. CLEAR
- Registration is published under Neen S.p.a.. CLEAR
- DNS for this domain is served by cloudflare.com. NOTED
- The registration is paid up to 2027-03-31. NOTED
- The earliest public archive of this site is from 2014-06-30. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about mecshopping.it at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
