Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

Mediabox is a South African ecommerce site presenting Google TV-certified streaming devices—including the Rocket, Maverick 2, Maverick, and Neo Stick—alongside product specifications, pricing, retailer availability, support, warranties, and business deployment services.

Scam/Impersonation Risk

No contradictions, phishing indicators, or malicious infrastructure findings were observed. The homepage presents a coherent consumer-electronics business model, with product information, pricing, support pathways, warranties, and retailer distribution rather than credential harvesting or financial manipulation. Normal interaction, including account login where required for standard use, is appropriate.

EVIDENCE

- The homepage identifies Mediabox as a streaming-device retailer and describes Google TV certification, 4K products, retailer availability, and customer support.
- Behavioral testing recorded no login form, hidden sensitive form, external password submission, wallet connection, clipboard hijacking, or cloaking.
- External reputation checks found no malicious or suspicious detections, no blacklist result, and zero abuse reports.

Regulatory Verification Notes

The site operates as a hardware ecommerce and enterprise-solutions business, not as a financial service provider. Its commercial content does not state a financial license or registration number; this is a limited disclosure point requiring routine business verification, not evidence of deception. The domain is registered through Afrihost, and the site uses valid transport encryption issued by a known certificate authority.

EVIDENCE

- The homepage describes consumer and business streaming hardware, warranties, retail sales, and enterprise deployment services.
- Registered 2013-09-12 (~12.89 years old); registrar: Afrihost.
- Hosted on AS13335 (Cloudflare); provider: CLOUDFLARENET - Cloudflare, Inc., US.
- TLS certificate issued by WE1 (DV), valid to 2026-09-08T22:21:51+00:00.

What to Verify Next

Before a material purchase or enterprise deployment, confirm the applicable seller identity, warranty coverage, returns process, and retailer relationship through the site's support or contact channels and the independently identified retail outlet. Where required for procurement, obtain the formal business and tax documentation associated with the contracting seller.

EVIDENCE

- The homepage advertises product pricing, retailer availability, warranties, and support.
- The business content identifies both consumer sales and enterprise deployment services.
- No license or registration number is presented in the supplied commercial content.

Summary Verdict

Mediabox is a legitimate, established, and trustworthy website with a coherent commercial purpose and no observed indicators of scam, phishing, or impersonation. The converging identity, content, reputation, and technical signals support normal use.

Infrastructure Integrity

Cloudflare CDN/WAF protection fronts the site, and all observed addresses were CDN edge servers on AS13335; no origin candidate was identified. This reduces direct exposure of the underlying service and is a mitigating infrastructure control, although it is not independently proof of legitimacy.

Closing Assessment

Normal browsing, account login, and standard purchasing or business interaction are appropriate, subject to ordinary retention of transaction and warranty records.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of mediabox.co.za.

- The request stayed on mediabox.co.za. It was not redirected to another domain. CLEAR
- Registration is published under Afrihost. CLEAR
- DNS for this domain is served by digitalocean.com, across 3 name servers. NOTED
- The registration is paid up to 2026-09-12. NOTED
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about mediabox.co.za at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
