

Is mediamarkt.pl legit? TrustSniffer's high-trust assessment: 100/100

mediamarkt.pl

Verdict

100

OUT OF 100

HIGH TRUST

mediamarkt.pl appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-10 by automated analysis. Classification confidence 55%.

What this site appears to be

Polish-language ecommerce storefront for MediaMarkt listing product categories, promotions (up to 80% sale), services, mobile app and contact/phone-order options. Standard retail content without investment or credential-harvesting indicators.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

This is a Polish-language MediaMarkt online retail storefront presenting consumer electronics, household appliances, product categories, promotions of up to 80%, store services, in-store pickup, a mobile application, and contact or phone-order options; its apparent business model is conventional ecommerce supported by product sales, financing, installation, repairs, warranties, and customer loyalty services.

Scam/Impersonation Risk

No contradictions were observed across the available evidence: there were no phishing, impersonation, malicious-content, blacklist, or brand-conflict indicators. The homepage presents a coherent retail model rather than investment, cryptocurrency, or credential-harvesting activity, and its forms are limited to search, account signup, and contact or phone ordering. The available reputation checks were clean, while the domain is long-established; these signals support an apparently legitimate and established website, although the real-world operator identity remains independently unverified. Evidence:

- The homepage presents standard MediaMarkt retail categories, promotions, services, store information, and consumer-electronics purchasing activity.
- Behavioral inspection recorded no hidden forms, password submissions to external destinations, cloaking, wallet activity, clipboard manipulation, or suspicious inline scripts.
- The domain registration record shows a creation date of 1998-10-12 and an age of 27.85 years.
- External checks recorded 0 malicious and 0 suspicious detections, with blacklist status false and abuse reports recorded as 0.

Regulatory Verification Notes

The site appears to operate as a consumer retailer rather than as a financial or otherwise third-party-regulated service. No license or registration number is claimed in the supplied site analysis, so the applicable merchant-identity and consumer-disclosure details should be treated as a transparency item requiring ordinary verification rather than as evidence of misconduct. The available material does not independently establish the legal entity operating the storefront, and the absence of a broker-dataset match provides contextual reassurance only, not a legal or licensing determination. Evidence:

- The business model is classified as ecommerce retail, covering consumer electronics, household appliances, financing, repairs, installation, warranties, and store pickup.
- The homepage contains substantial product, service, promotion, app, and customer-contact content, with no investment solicitation or regulated-finance claim identified.

- Domain registration records identify united-domains GmbH as registrar.
- The site's transport certificate is an OV certificate issued by GeoTrust TLS RSA CA G1 for MMS Technology GmbH, valid through 2026-09-04.

What to Verify Next

Before credential or payment interactions, an institutional user should independently confirm the merchant identity, applicable consumer terms, return and warranty conditions, and payment-protection arrangements through official records or an independently sourced contact route. Account access should be limited to the intended official domain and standard payment protections should be retained for any purchase. Evidence:

- The homepage provides product sales, financing, extended warranties, installation, repairs, and store-pickup pathways that warrant confirmation against the applicable consumer terms.
- The available analysis identifies an account-signup form but no login form or untrusted form destination on the inspected page.
- The site's contact and phone-order options provide an additional channel for confirming merchant details before a transaction.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture for its stated retail purpose. The conclusion is strong at the website-risk level, while independent confirmation of the real-world operating entity remains appropriate before sensitive commercial engagement.

Infrastructure Integrity

The website is served through Cloudflare’s CDN/WAF infrastructure, which is a mitigating control that reduces direct exposure of the hosting environment but does not itself prove legitimacy. The observed service resolves through Cloudflare edge infrastructure in the United States, with potential origin candidates also identified.

Evidence:

- Hosted on AS13335, CLOUDFLARENET — Cloudflare, Inc., US.
- Observed edge IPs include 141.101.90.96, 141.101.90.97, 141.101.90.98, and 141.101.90.99.
- TLS is issued by GeoTrust TLS RSA CA G1 at OV validation level and is valid to 2026-09-04.

Closing Assessment

Normal browsing and ordinary retail use are proportionate to the available risk posture; independent merchant, policy, and payment-protection checks should nevertheless be completed before credential submission or payment.

Written analysis generated 2026-08-10 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100

Identity verification confidence

50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of mediamarkt.pl.

- The request stayed on mediamarkt.pl. It was not redirected to another domain. CLEAR
- Registration is published under united-domains GmbH. CLEAR
- DNS for this domain is served by akam.net, across 4 name servers. NOTED
- The registration is paid up to 2026-10-11. NOTED
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about mediamarkt.pl at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
