Key findings

- Automated classification: Not Scam.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is MediaMart's Vietnamese ecommerce storefront for consumer electronics, home appliances, computers, and mobile devices, presenting clearly priced merchandise, promotions, installment-payment options, account access, shopping-cart functions, store information, and a sales hotline in support of online sales and a physical supermarket network.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing indicators, malicious content, or deceptive financial propositions were observed. The coherent retail catalog, conventional purchasing journey, stable behavior, established traffic footprint, and clean external reputation converge strongly with the presented MediaMart identity. The observed network activity was assessed as consistent with benign ecommerce operation; testing found no hidden forms, credential forwarding, cloaking, clipboard manipulation, or suspicious scripts.

- The homepage presents a substantial, internally consistent catalog covering televisions, audio equipment, air conditioners, refrigerators, computers, phones, and related products, with prices and retail promotions.
- The homepage identifies MediaMart as a Vietnamese electronics-supermarket system and supplies store-finding information, operating hours, a sales hotline, account functions, and a shopping cart.
- Interactive testing completed 2 of 2 runs successfully and found 0 hidden forms, 0 external password forms, 0 suspicious inline scripts, and no cloaking.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no search-security warning, no abuse reports, and a global traffic rank of 68,079.

Regulatory Verification Notes

The observed business model is conventional consumer retail rather than an intrinsically regulated financial or investment service. No licensing claim appears in the supplied homepage material, and none is necessary to substantiate the site's ordinary ecommerce purpose. The available evidence does not include separate legal or corporate-identity pages from which company-registration particulars, contracting-entity details, or formal consumer-policy disclosures could be assessed; this is a limited documentation note, not an indication of deception. No relevant adverse broker-reputation match was identified.

- The homepage describes retail sales supported by discounts, flash promotions, physical-store access, and installment purchasing; it does not advertise brokerage, investment, cryptocurrency, or yield products.
- The homepage's installment language includes offers stated as "0–0.5%," but the supplied content does not identify a financial-services license or claim that MediaMart itself acts as a regulated lender.

- The site's transport encryption uses a DV certificate issued by GlobalSign GCC R6 AlphaSSL CA 2025, valid until 2027-01-25.
- The supplied third-party broker dataset returned no matching broker record for the site.

What to Verify Next

For procurement, high-value purchases, or institutional onboarding, the contracting company name, registration particulars, invoice issuer, warranty terms, returns policy, and installment-provider terms should be matched across the checkout documentation and official corporate records. Official store and contact channels may also be confirmed independently before arranging unusually large orders or offline payments.

- The homepage advertises both an online catalog and access to a physical supermarket network, providing two channels through which commercial identity can be cross-checked.
- The homepage offers account registration, login, cart functionality, and installment purchasing, making checkout terms, privacy notices, and payment-party identification relevant to transaction due diligence.
- The supplied page evidence covers the ecommerce homepage but does not provide the text of separate terms, privacy, warranty, returns, or corporate-registration pages.

Summary Verdict

The website is a legitimate, established, and trustworthy ecommerce operation. Its coherent commercial identity, mature retail presentation, clean reputation, meaningful traffic presence, and benign observed behavior provide mutually reinforcing evidence of authenticity, with no contradictory risk signals identified.

Infrastructure Integrity

The site is served from IP address 103.21.149.36 in Vietnam through CMC Telecom infrastructure. This identifiable hosting and valid encrypted transport support operational integrity, although infrastructure controls are mitigating technical signals rather than independent proof of business legitimacy.

- The hosting infrastructure serves the site from AS38732 (CMCTELECOM-VN — CMC Telecom Infrastructure Company, VN) at 103.21.149.36.
- The site's certificate provides domain-validated TLS protection through a recognized issuer.

Closing Assessment

Normal interaction—including browsing, account login, standard checkout, and routine transactions—is appropriate, subject to ordinary ecommerce precautions and proportionate commercial due diligence for unusually large purchases.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of mediamart.vn.

- The request stayed on mediamart.vn. It was not redirected to another domain. CLEAR
- It is hosted on CMCTELECOM-VN, from a server in VN. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about mediamart.vn at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
