

Is mediasetinfinity.es legit? TrustSniffer's high-trust assessment: 100/100

mediasetinfinity.es

Verdict

100

OUT OF 100

HIGH TRUST

mediasetinfinity.es appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 70%.

What this site appears to be

Mediaset Infinity Spanish-language streaming portal offering on-demand series, films, live TV channels and editorial/entertainment content. Primary call-to-action is subscription (Infinity+); content is editorial and programme listings rather than financial or credential requests.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2025.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This Spanish-language website is a streaming and entertainment portal presenting on-demand television series, films, live channels, programme listings, news, sports, and editorial content, with subscription access promoted through its Infinity+ service and possible advertising-supported monetisation.

Scam/Impersonation Risk

No scam, phishing, blacklist, or brand-impersonation contradiction was observed. The homepage presents a coherent media-service model rather than a deceptive financial or credential-harvesting proposition, and the captured interaction showed no login form, hidden sensitive form, externally posted password form, wallet connection, or cloaking behavior. Some external network activity occurred during normal page operation, but it was not accompanied by abuse indicators or suspicious collection of credentials or funds. The available evidence is therefore consistent with an established, apparently legitimate streaming website, while the real-world operator identity remains independently unverified.

EVIDENCE

- Homepage content identifies a Spanish streaming portal offering series, films, live television, and Infinity+ subscriptions; no red-flag content was recorded.
- Homepage interaction testing found no login form, hidden form, external password form, wallet-provider detection, wallet-drainer behavior, or cloaking.
- Domain age: 1.13 years.
- Web archive: 1,115 snapshots spanning 2025–2026, covering 2 years.

Regulatory Verification Notes

The site's observed business model is entertainment streaming rather than financial intermediation, so no financial licence claim was expected from the homepage. The captured content does not present a licensing claim, licence number, or independently verified operator identity; this is a transparency and identity-verification note, not evidence of a scam. External reputation checks were clean, the domain appears within the established global web-traffic population, and no broker-dataset match was identified. These signals support the high-trust classification, but they do not prove the legal entity behind the service.

EVIDENCE

- Homepage title and programme catalogue describe “Mediaset Infinity” as an online series, film, and television service with Infinity+ subscriptions.
- External reputation checks recorded zero malicious and zero suspicious detections, with no blacklist or phishing result.
- The domain had a global traffic rank of 24119 and was within the top 1 million sites.
- Hosting infrastructure: AS16509, AMAZON-02 - Amazon.com, Inc., US; TLS certificate issued by Amazon RSA 2048 M01, DV validation, valid through 2026-11-27.

What to Verify Next

Before paid subscription or credential use, an ordinary independent check should confirm the merchant identity shown in the service’s legal and billing materials, review cancellation, refund, and renewal terms, and ensure that payment protections are available. Contact channels should be confirmed through an independently sourced official route rather than relying solely on a message or page reached through an unsolicited link.

EVIDENCE

- The homepage’s primary commercial action is subscription enrolment for Infinity+, making billing, renewal, and cancellation terms the relevant verification points.
- The captured page contained no sensitive form, so account and payment checks should be performed only on the expected official subscription flow.
- The available identity-verification evidence is insufficient to independently connect the website to a specific real-world operator.

Summary Verdict

The overall posture is **high trust and low risk**, with no observed contradiction suggesting scam activity, phishing, impersonation, or malicious operation. Available evidence is consistent with an established, apparently legitimate streaming website, although operator identity is not independently verified.

Infrastructure Integrity

The site is protected by an AWS CDN/WAF layer, and observed addressing was limited to CDN edge infrastructure rather than a directly exposed origin candidate. This is a mitigating architectural signal that reduces direct origin exposure, but it is not, by itself, proof of legitimacy.

Closing Assessment

Ordinary use is proportionate to the assessment, provided subscription, identity, cancellation, and payment-protection checks are completed through the expected official service flow.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of mediasetinfinity.es.

- The request stayed on mediasetinfinity.es. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2025-06-24. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about mediasetinfinity.es at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
