

Is mediastream.co legit? TrustSniffer's high-trust assessment: 95/100

mediastream.co

Verdict

95

OUT OF 100

HIGH TRUST

mediastream.co appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-02 by automated analysis. Classification confidence 55%.

What this site appears to be

Mediastream presents an established B2B media technology platform offering OTT, live streaming, audio and podcast solutions, content management, CDN delivery, advertising monetization, and AI-powered video tools. The page includes product descriptions, company history, FAQs, customer lead-generation, and newsletter forms.

Evidence status and limitations

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

Mediastream is an established B2B media-technology platform presenting OTT, live-streaming, audio and podcast services, content management, CDN delivery, advertising monetization, and AI-powered video tools for organizations seeking to create, distribute, and monetize digital content.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, impersonation signals, or malicious-content findings were observed. The homepage presents a coherent corporate B2B service model, with product information, company history, FAQs, customer lead generation, and newsletter functions consistent with a legitimate software provider.

- The homepage identifies Mediastream as a strategic OTT and live-streaming technology partner and describes its commercial services.
- The domain was registered on 2022-10-19 and is approximately 3.79 years old through GoDaddy.com, LLC.
- External reputation checks recorded no malicious or suspicious detections associated with the website.

Regulatory Verification Notes

The site appears to operate as a commercial B2B software and services provider rather than presenting a regulated financial offering. No license claim or license number is stated in the supplied site content; this is a limited disclosure point for procurement or regulatory due diligence, not evidence of illegitimacy. The registration privacy arrangement is an administrative matter, while the site's valid transport security and established commercial presentation support its legitimacy.

- The homepage describes customized B2B service contracts, platform services, and implementation-oriented offerings.
- Hosting telemetry identifies AS209242 operated by CLOUDFLARESPECTRUM - Cloudflare London, LLC, US.
- TLS is issued by WE1 at DV validation level and is valid to 2026-10-14 22:31 UTC.

What to Verify Next

For formal onboarding, confirm the contracting legal entity, service terms, and applicable licensing requirements through the organization's normal vendor-due-diligence process. Contact and support channels should be validated through the site's published corporate routes and an independent business record before executing material procurement commitments.

- The homepage provides Contact Us and customer lead-generation functions.
- The homepage includes company, team, customer, support, and FAQ content suitable for standard vendor review.

Summary Verdict

Mediastream presents as a legitimate, established, high-trust website with a coherent business identity and no observed contradiction signals. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The website is protected by Cloudflare CDN/WAF infrastructure. The observed address, 198.202.211.1, is a CDN edge address, and no origin server address was exposed during resolution; this reduces direct origin exposure and is a mitigating infrastructure signal.

Closing Assessment

Normal account use and routine commercial engagement are appropriate, with standard enterprise onboarding controls applied for significant contractual or financial commitments.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of mediastream.co.

- The request stayed on mediastream.co. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by co.uk, across 4 name servers. NOTED
- The registration is paid up to 2027-10-19. CLEAR
- It is hosted on CLOUDFLARESPECTRUM, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about mediastream.co at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
