

Is mediatelly.co legit? TrustSniffer's high-trust assessment: 100/100

mediatelly.co

Verdict

100

OUT OF 100

HIGH TRUST

mediatelly.co appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 70%.

What this site appears to be

Mediatelly site homepage / landing content promoting drug information services, an app, and a PRO paid offering for companies; includes navigation to careers, advertising, support, and policy pages. Cookie notice present.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2024.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Medately is a consumer- and professional-facing healthcare reference website presenting drug information, medication-interaction resources, an accompanying mobile application, and a paid PRO service for companies, supported by advertising and data-licensing activities.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent healthcare-information purpose, with country selection, support, policy, careers, advertising, and company-service navigation rather than deceptive investment, payment, or credential-harvesting content. The site promotes its app with a stated 4.9 rating and “over 36k” ratings, and offers drug-information functions such as interaction checking and restrictions-of-use information. Behavioral testing found no login form, hidden form, external password form, wallet activity, cloaking, clipboard manipulation, or suspicious script activity. External reputation checks recorded no malicious or suspicious detections, no phishing or blacklist finding, and no abuse reports. Available evidence therefore supports an apparently legitimate, low-risk site, while independently verifying the real-world operator remains appropriate.

EVIDENCE

- Homepage: healthcare/drug-information content, app promotion, PRO offering, advertising, data licensing, support, and policy navigation.
- Homepage: no sensitive form, login form, hidden form, or untrusted form destination was detected.
- Behavioral testing: 2 successful runs; 0 wallet-provider, wallet-drainer, clipboard-hijack, cloaking, or suspicious-inline-script events.
- Domain and archive records: registered 2014 (~11.87 years old); 95 archive snapshots spanning 2024–2026 (3 years tracked), with no suspicious repurposing or semantic drift.

Regulatory Verification Notes

The site provides Terms and Conditions, Privacy Policy, Cookie Policy, Cookie Settings, support, and contact navigation. The supplied pages do not show a claimed license, licensing authority, or license number; for a healthcare-information service, this is a transparency and regulatory-scope question rather than evidence of deception. The available registration record identifies Gandi SAS as registrar and lists Modra Jagoda, d.o.o. as the organization, but the operator’s real-world identity is not independently verified. The overall evidence

remains consistent with an established, apparently legitimate website, and the absence of adverse external reputation findings supports that assessment.

EVIDENCE

- Policy navigation: Terms and Conditions, Privacy Policy, Cookie Policy, and Cookie Settings are presented on the site.
- Registration record: registrar Gandi SAS; organization Modra Jagoda, d.o.o.; creation date 2014-10-01T09:04:42Z; expiration date 2026-09-30T23:59:59Z.
- Site transport: TLS certificate issued by YR2, DV validation, valid to 2026-11-04.
- Hosting telemetry: served from AS396982, Google Cloud Platform, Google LLC, US.

What to Verify Next

Before credential or payment interactions, an organization should independently confirm that the legal entity associated with the service is the intended merchant or service provider, review the applicable terms and cancellation or refund provisions, and confirm payment-protection options. If the service is being used in a regulated healthcare workflow, the relevant national authority should be consulted to determine whether any local authorization, professional qualification, or medical-information disclaimer applies. Official support and contact channels should also be confirmed through an independent route before sensitive account or commercial matters are submitted.

EVIDENCE

- Homepage: links to support, contact, Terms and Conditions, and Privacy Policy.
- Homepage: the PRO service is presented as a paid offering for companies.
- Site navigation: country selection indicates that service context may vary by jurisdiction.

Summary Verdict

Mediately presents an established, apparently legitimate website with a high-trust, low-risk posture. Its coherent healthcare purpose, clean technical and external-reputation signals, sustained domain presence, and absence of contradictory indicators support normal informational use; operator identity, however, is not independently proven.

Infrastructure Integrity

The site resolves to Google Cloud Platform infrastructure in the United States, with no CDN detected and one identified hosting/origin address. This is conventional cloud hosting rather than an inherently suspicious configuration, and the valid domain-validated TLS certificate provides transport protection; infrastructure should be treated as a mitigating technical signal, not as proof of corporate legitimacy.

EVIDENCE

- Hosting: AS396982, Google Cloud Platform — Google LLC, US; one unique resolved IP and no detected CDN edge IP.
- TLS: issuer YR2; validation level DV; valid through 2026-11-04T22:49:07+00:00.

Closing Assessment

Ordinary informational use is proportionate to the available evidence; account or payment activity should proceed after the stated independent merchant-identity, terms, and payment-protection checks are completed.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of mediatelly.co.

- The request stayed on mediatelly.co. It was not redirected to another domain. CLEAR
- Registration is published under Gandi SAS. CLEAR
- DNS for this domain is served by awsdns-28.net, across 4 name servers. NOTED
- The registration is paid up to 2026-09-30. NOTED
- The earliest public archive of this site is from 2024-03-27. CLEAR
- It is hosted on GOOGLE-CLOUD-PLATFORM, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about mediately.co at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
