Key findings

- Automated classification: Not Scam.
- Public web-archive history exists since 1999.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is a Japanese corporate services site presenting managed cloud and internet-infrastructure support for businesses, with an apparent business model based on AWS consulting, migration, operations, monitoring, security, hosting, and related support contracts.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent corporate AWS-services proposition, while behavioral testing found no phishing form, hidden sensitive form, cloaking, wallet activity, clipboard manipulation, or suspicious script behavior. External reputation checks found no malicious or suspicious detections, and the site's long, continuous historical presence is consistent with an established operating entity.

- The homepage identifies 株式会社メディアウォーズ and presents corporate AWS infrastructure services without impersonation indicators.
- The site's behavioral profile recorded no login form, hidden form, password submission to an external destination, or wallet-drainer activity.
- The domain was first archived on 1999-04-22 and has an age of 27.277207392197127 years.
- The archive contains 1,709 snapshots spanning 1999–2026, with 28 years tracked.

Regulatory Verification Notes

The corporate and service content identifies Mediawars, provides physical office and customer-contact information, and describes AWS implementation, migration, operations, monitoring, security, performance testing, and managed hosting. The site states that it holds AWS Select Tier Service Partner status and describes approximately 30 years of server-operation experience, including 24/7 monitoring and support. No specific financial or professional licence is claimed in the supplied content; this is a regulatory-disclosure point for organisations whose procurement rules require licensing confirmation. The available third-party broker context contains no match.

- The corporate service page identifies 株式会社メディアウォーズ, office locations, telephone support, and customer-contact channels.
- The page states AWS Select Tier Service Partner status and describes AWS construction, migration, operations, monitoring, security, and performance services.
- The site is served from AS9353, MEDIAWARS - MEDIAWARS co.,Ltd., JP.

- TLS uses GlobalSign RSA OV SSL CA 2018 with OV validation, issued to MEDIAWARS COMPANY LIMITED, valid to 2026-12-21.
- What to Verify Next**
- For formal procurement, the prospective customer should confirm the applicable contractual entity, service scope, support commitments, and any sector-specific licensing or registration requirements through the company’s corporate and contracting documentation. Contact details should be validated through an independently obtained corporate source before executing a material services agreement.
- The service page provides corporate contact channels and office information suitable for independent confirmation.
 - The page describes flexible maintenance plans, monitoring, incident response, and operational support that should be reflected in any formal statement of work.
 - The site's stated AWS partner status and service claims can be matched against the relevant provider and procurement records.

Summary Verdict

The website presents as a legitimate, established, and trustworthy corporate service provider. The convergence of coherent business content, sustained historical presence, clean observed behavior, and consistent technical identity supports normal interaction, including account login and standard use.

Infrastructure Integrity

- The site resolves directly to a MEDIAWARS-hosted origin in Japan rather than a detected CDN edge, with one resolved IP and no identified CDN or WAF layer. This is a neutral infrastructure characteristic and does not undermine the strong overall assessment.
- Hosting infrastructure resolves to one IP address, with zero detected edge IPs and one likely origin IP.
 - The hosting provider is MEDIAWARS - MEDIAWARS co.,ltd., JP, under AS9353 and the APNIC registry.

Closing Assessment

Normal interaction and standard business engagement are appropriate, with ordinary organisational procurement and contractual controls applied to any external technology provider.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of mediawars.ne.jp.

- The request stayed on mediawars.ne.jp. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 1999-04-22. CLEAR
- It is hosted on MEDIAWARS, from a server in JP. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about mediawars.ne.jp at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
