Full analysis

Overview

The website is a Portuguese-language corporate presence for Mega Promo, a Brazilian trade-marketing and retail-merchandising agency that presents nationwide point-of-sale execution, workforce deployment, inventory monitoring, and analytical reporting services to brands.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing behavior, or other fraud indicators were observed. The homepage presents a coherent business model centred on in-store promoters, product-display execution, price and stock monitoring, and reporting; its contact, sales-enquiry, employment-enquiry, and WhatsApp functions do not request sensitive credentials or transmit forms to an untrusted destination. This consistency is reinforced by a long-established domain and sustained archival presence without evidence of suspicious repurposing.

- Domain-registration records identify LJ DA SILVA MARKETING PROMOCIONAL ME as the owner; registered 23 January 2013 (~13.53 years old), with expiration on 23 January 2036.
- The web archive contains 56 snapshots spanning 22 September 2018–19 April 2026 (9 years tracked), with no detected semantic drift or suspicious repurposing.
- The homepage showed no hidden forms, login form, suspicious inline scripts, cloaking, clipboard interference, wallet interaction, or unauthorized external form submissions.
- The homepage identifies the site as “Mega Promo - Merchandising | Trade Marketing Nacional” and presents a consistent trade-marketing agency identity without detected brand impersonation.

Regulatory Verification Notes

The site describes an ordinary corporate services business rather than a financial, investment, brokerage, or cryptocurrency operation. Its claim of nationwide activity since 2010 and a workforce exceeding 3,500 professionals is presented as corporate marketing content and is not independently substantiated by the supplied evidence. No regulated-service or licensing claim appears, and none would ordinarily be inferred solely from the stated trade-marketing business model. The available site capture does not provide sufficient content from dedicated legal pages to assess detailed corporate-registration, privacy, or contractual disclosures.

- The homepage describes services across supermarkets, wholesale outlets, and retail networks, covering product placement, pricing, inventory availability, and field reporting.
- The homepage claims operations since 2010, nationwide coverage, and more than 3,500 professionals.

- The observed form is limited to contact, sales, employment, and WhatsApp enquiries and is not classified as sensitive.
- No matching broker profile or third-party brokerage warning was identified in the supplied reputational context.

What to Verify Next

For material procurement, employment, or service-contract decisions, the registered business identity should be matched to contracting documents and independently confirmed through the applicable Brazilian corporate registry. Claimed client relationships, workforce scale, and nationwide operational capacity should be validated through references and ordinary vendor due diligence. Official contact channels should also be confirmed before exchanging confidential commercial or applicant information.

- The homepage lists “Empresa,” “Clientes,” and “Contato” navigation labels, providing appropriate starting points for identity, reference, and channel validation.
- Prospective clients and job applicants are directed to initiate contact through the site’s form or WhatsApp.
- The site’s stated operating scale and client relationships are self-published claims in the homepage content.

Summary Verdict

The website presents as a legitimate, established, and trustworthy corporate service site. Its identity, operating purpose, technical behavior, historical presence, and external reputation converge without material contradiction. Normal interaction, including standard use and any account login the site may make available, is appropriate.

Infrastructure Integrity

The site is served through Fastly’s mainstream CDN/WAF infrastructure, which reduces direct origin exposure and provides a meaningful technical mitigation without independently establishing business legitimacy. Transport encryption is valid and uses standard domain validation.

- Served from AS54113 (Fastly, Inc., US) through observed edge address 199.36.158.100.
- The observed hosting footprint consists of 1 CDN edge IP and no exposed origin candidate.
- TLS certificate issued by WR3 (DV), valid to 26 September 2026.

Closing Assessment

Prospective users may engage with the site normally, applying standard vendor, contracting, and information-sharing controls appropriate to a corporate service provider.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about megapromomarketing.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
