

Is melekuse.org a scam? TrustSniffer's high-risk assessment: 0/100

melekuse.org

Verdict

0

OUT OF 100

CRITICAL RISK

melekuse.org shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Uzbek-language promotional page describing Pin Up casino's welcome bonus (up to 125% + 250 free spins), deposit requirement (\$10), and wagering rules (x50). Encourages account creation and deposit to access bonus; includes step-by-step deposit and free-spin distribution instructions.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What melekuse.org served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2017.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

This website is a promotional Uzbek-language landing page for the Pin Up online casino, presenting welcome bonuses, free spins, deposit instructions, account-registration prompts, and wagering conditions intended to drive users toward funded gambling activity.

Scam/Impersonation Risk

The site presents a **high-risk sensitive-interaction profile**. Its homepage encourages registration and a minimum deposit before the advertised service is available, promising up to 125% bonus credit and 250 free spins subject to a 50-times wagering requirement; prominent page text also displays a 120% figure, creating an internal inconsistency in the promotion. These deposit-before-service mechanics, aggressive incentive claims, and limited supporting evidence are materially concerning. External reputation checks recorded five malicious detections and a confirmed blacklist designation from multiple sources. The domain was also observed using the contact address anomaly `info@example.come`, which is a contact-channel integrity issue consistent with a deliverability-breaking typo or possible typosquat. No separate legal-entity identity contradiction was identified in the supplied page evidence, but the blacklist and malicious detections are sufficient to make credential submission, account access, and financial interaction inappropriate.

EVIDENCE

- The homepage promotes a Pin Up welcome offer of up to 125% plus 250 free spins, a minimum deposit of \$10, and a 50-times wagering requirement.
- The homepage contains registration and deposit instructions, including funding the account before the bonus is credited.
- External reputation telemetry recorded 5 malicious detections and a confirmed blacklist across 2 external sources.
- The domain was registered on 2025-02-20; recorded domain age is 1.49 years. Archive telemetry records 92 snapshots spanning 2017-04-14 to 2026-03-17, with 10 years tracked.

Regulatory Verification Notes

The observed content does not state a licensing authority, license number, or other clear regulatory basis for the gambling service. It also provides limited operator and governance disclosure on the supplied landing page, so the apparent connection to the named casino brand remains unverified rather than established. The domain is registered through Hosting Concepts B.V. d/b/a Registrar.eu, but registrar information alone does not validate the operator, gambling authorization, or promotional claims. Transport security is present, but the certificate is domain-validated only and should not be treated as evidence of regulatory standing.

EVIDENCE

- The homepage contains no stated licensing authority, registration number, or license number for the advertised gambling activity.
- The domain registrar is Hosting Concepts B.V. d/b/a Registrar.eu.
- The site is served from AS13335, CLOUDFLARENET — Cloudflare, Inc., US.
- TLS is issued by WE1 at DV validation level and is valid to 2026-11-08.

What to Verify Next

Before any interaction involving funds or account credentials, an institution should independently confirm that the named operator is authorized for the relevant jurisdiction through the applicable gambling regulator's public register. The advertised bonus, wagering, withdrawal, and account terms should be obtained from the operator's independently verified official channel and checked for consistency. Official support and contact channels should be confirmed through an independent, offline route, and any redirect from the landing page should be assessed before credentials or payment details are entered.

EVIDENCE

- The supplied page is classified as promotional landing content rather than a clearly identified regulated-operator portal.
- The captured page contains no login form, sensitive form, or external password form.
- Observed behavior recorded 28 external XHR requests and 16 external POST requests, including 2 non-whitelisted XHR requests and 2 non-whitelisted POST requests.

Summary Verdict

The website has a **critical trust posture** and should be treated as unsuitable for sensitive interaction. The available evidence does not independently verify the real-world operator, while confirmed external threat detections and the site's deposit-driven promotional model create a material risk of financial and credential exposure.

Infrastructure Integrity

Cloudflare CDN/WAF protection is present, and all observed addresses were CDN edge servers rather than an observable origin server. This reduces direct exposure of the hosting origin and is a mitigating infrastructure characteristic, but it does not establish that the website or its operator is legitimate.

Closing Assessment

Enterprise users should limit any interaction to non-sensitive observation and should not submit credentials, create accounts, or transfer funds through this site unless independent regulatory, operator-identity, and payment-protection checks produce satisfactory results.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

- 01 Governance Risk

 - The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
 - Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of melekuse.org.

- The request stayed on melekuse.org. It was not redirected to another domain. CLEAR
- Registration is published under Hosting Concepts B.V. d/b/a Registrar.eu. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-02-20. NOTED
- The earliest public archive of this site is from 2017-04-14. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about melekuse.org at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
