

Is melhorenvio.com.br legit? TrustSniffer's high-trust assessment: 80/100

melhorenvio.com.br

Verdict

80

OUT OF 100

HIGH TRUST

melhorenvio.com.br appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-12 by automated analysis. Classification confidence 75%.

What this site appears to be

Melhor Envio is a Brazilian logistics intermediation platform offering freight calculation, discounted shipping rates, integrations with e-commerce platforms and tracking tools. The page contains product descriptions, FAQs, customer testimonials, and CTAs for signup and freight calculation.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2015.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Melhor Envio is a Brazilian logistics intermediation platform that helps e-commerce merchants calculate freight, access discounted shipping options, integrate delivery operations with commerce platforms and ERPs, and track shipments across carriers. The homepage presents free registration, freight quotation, reverse-logistics support, delivery-point access, and account-based shipping management as its apparent business model.

Scam/Impersonation Risk

No contradictions were observed across the supplied evidence: there are no phishing, impersonation, or malicious-content indicators, and external reputation checks returned no malicious or suspicious detections. The site's established domain continuity, substantial archival record, consistent logistics content, and absence of repurposing indicators support an apparently legitimate and established web presence. This supports a low scam or impersonation risk, while the real-world operator identity remains independently unverified.

EVIDENCE

- The domain registration record shows creation on 2014-12-28 and an age of 11.63 years.
- Web archives contain 544 snapshots spanning 2015–2026, covering 12 tracked years, with a maximum observed gap of 1 year.
- The homepage is classified as a logistics and shipping-intermediation service, with no reported red flags or brand-impersonation indicators.
- External reputation checks recorded 0 malicious detections and 0 suspicious detections.

Regulatory Verification Notes

The homepage presents a coherent commercial model involving freight intermediation, negotiated shipping rates, integrations, tracking, and fees associated with shipping services. The available material does not identify a licensing authority or registration number; this is a regulatory-transparency item to resolve according to the services and jurisdiction involved, not evidence of a scam. A registration record lists LWSA S/A as the domain owner, but the supplied evidence does not independently verify that entity as the real-world operator of the website. A third-party broker dataset returned no match and should be treated only as contextual reputational information. Behavioral monitoring also recorded six non-whitelisted external XHR requests; this observation was not accompanied by external password forms, hidden forms, wallet activity, clipboard manipulation, or cloaking, so it does not establish abusive behavior.

EVIDENCE

- The site is served from AS16509, operated by AMAZON-02 – Amazon.com, Inc., US.
- The transport certificate is issued by Amazon RSA 2048 M04, uses DV validation, and is valid to 2026-11-02 23:59:59 UTC.
- The available homepage material does not state a licensing authority or license number.
- Behavioral testing recorded 8 external XHR requests, of which 6 were non-whitelisted; 0 external POST requests and 0 password forms were observed.

What to Verify Next

Before credential or payment interactions, an organization should independently confirm the operating entity and establish whether any transport, payment, consumer-protection, or other sector-specific registration applies to the intended use. Commercial users should also review the applicable service, refund, claims, and shipment-loss terms, and confirm official support channels through an independently sourced route rather than relying solely on contact details presented on the site.

EVIDENCE

- The homepage provides institutional navigation, support access, FAQs, and account-management entry points that can be used as reference points for independent validation.
- The freight calculator states that displayed values are estimates and may vary because of taxes, dimensional weight, shipment volume, and other factors.
- The site exposes signup and freight-calculation workflows, making identity, terms, and payment-protection checks relevant before account-based use.

Summary Verdict

The overall posture is **high trust and low risk**, with available evidence consistent with an established, apparently legitimate website. The classification supports ordinary service interaction, but it does not independently prove the identity of the real-world operator.

Infrastructure Integrity

The website is protected by CDN/WAF infrastructure, and the observed addresses were CDN edge servers rather than identified origin candidates. The edge addresses 13.248.160.203 and 76.223.34.128 are associated with AS16509 and Amazon.com, Inc.; this protection mitigates direct exposure of the origin environment but is not, by itself, proof of legitimacy.

Closing Assessment

Prospective users may proceed with normal business due diligence, completing independent entity, terms, and payment-protection checks before submitting credentials or payment details.

Written analysis generated 2026-08-12 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of [melhorenvio.com.br](#).

- The request stayed on [melhorenvio.com.br](#). It was not redirected to another domain. [CLEAR](#)
- DNS for this domain is served by [awsdns-04.com](#), across 4 name servers. [NOTED](#)
- The registration is paid up to 2030-12-28. [CLEAR](#)
- The earliest public archive of this site is from 2015-03-14. [CLEAR](#)
- It is hosted on [AMAZON-02](#), from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about [melhorenvio.com.br](#) at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
