

Is melhorescartoes.com.br legit? TrustSniffer's high-trust assessment: 100/100

melhorescartoes.com.br

Verdict

100

OUT OF 100

HIGH TRUST

melhorescartoes.com.br appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 70%.

What this site appears to be

A Brazilian deals and credit-card-focused editorial site offering promotions, rankings of cards, coupon codes, miles transfer bonuses, app download prompts and newsletter/Telegram groups. Appears to be an established editorial property (since 2008) monetized via affiliates and ads.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2021.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This website is a Brazilian editorial and promotional platform focused on credit-card offers, airline miles, cashback, coupons, travel deals, and related consumer-finance content. Its apparent business model is content publishing supported by affiliate referrals, advertising, application downloads, newsletters, and notification channels rather than direct banking or brokerage services.

Scam/Impersonation Risk

No contradictions were observed: the available evidence shows no phishing, brand impersonation, blacklist, or malicious-reputation finding. The site's content is consistent with an established editorial property, and its homepage behavior did not reveal hidden forms, externally submitted password fields, wallet activity, clipboard manipulation, or cloaking. Some external requests, form submissions, and post-interaction page changes were observed, but these are reasonably attributable to promotional, application, newsletter, and advertising functionality and do not form a confirmed abuse pattern. The operator's real-world identity remains independently unverified, so the legitimacy assessment is evidence-consistent rather than identity-proven.

EVIDENCE

- Domain registration record: registered 2013 (~13.19 years old), with expiry recorded for 2030-06-05.
- Web archive: 169 snapshots spanning 2021–2026, covering 6 tracked years with a maximum observed gap of 1 year.
- External reputation checks: 0 malicious detections, 0 suspicious detections, no search-warning finding, and no blacklist match; the observed hosting address was also reported as whitelisted shared CDN infrastructure.
- Homepage interaction: no cloaking, hidden forms, password-external forms, wallet-connect activity, wallet-drainer behavior, or clipboard-hijacking activity detected.

Regulatory Verification Notes

The homepage presents a consumer editorial and affiliate model, with credit-card rankings, mileage-transfer promotions, coupon codes, retailer offers, app-download prompts, and newsletter or Telegram distribution. The supplied pages do not show a claimed financial-services license or registration number. For an editorial publisher this is a disclosure and scope-verification point rather than evidence of a scam, but any activity that moves beyond content and referral links should be assessed against the regulatory requirements applicable to that activity. The site's apparent legitimacy is supported by long-running registration continuity, active historical

presence, clean external reputation, and standard transport security; these signals do not independently establish the legal identity of the operator.

EVIDENCE

- Hosting telemetry: served from AS13335 (CLOUDFLARENET - Cloudflare, Inc., US).
- Transport security: TLS certificate issued by WE1 (DV), valid to 2026-09-27T06:37:35+00:00.
- Homepage content: identifies an editorial/deals property covering cards, miles, promotions, coupons, and travel loyalty rather than presenting itself as a bank, broker, or licensed financial institution.
- Third-party broker context: no matching broker record was identified; this is reputational context only and is not a licensing determination.

What to Verify Next

Before credential or payment interactions, an independent check should confirm the commercial identity behind any referral, application, subscription, or purchase flow and should review the applicable merchant terms, privacy terms, cancellation provisions, and payment-protection arrangements. Where a promoted service performs a regulated financial function rather than merely linking to a third-party provider, its authorization should be confirmed in the relevant official registry. Contact channels and application distribution should be reached through independently confirmed official routes rather than relying solely on an embedded promotion.

EVIDENCE

- The homepage includes a newsletter-signup form and an application-download prompt, creating distinct subscription and software-distribution paths to review.
- The published business model relies on affiliate referrals, advertising, application installs, and newsletter subscriptions, so commercial counterparties may differ from the editorial publisher.
- The site presents time-sensitive promotional offers, making offer validity, eligibility, and redemption conditions material to any transaction decision.

Summary Verdict

The available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture with no observed scam or impersonation contradiction. The principal qualification is that the real-world operator identity has not been independently verified, so the trust conclusion should not be treated as proof of ownership or legal identity.

Infrastructure Integrity

Cloudflare CDN and WAF infrastructure fronts the website. All observed addresses are Cloudflare edge servers on AS13335, with no origin candidates identified; this reduces direct origin exposure and is a mitigating infrastructure signal, not proof of legitimacy.

Closing Assessment

Ordinary browsing is proportionate to the evidence, while account or payment activity should follow the independent merchant-identity, terms, and payment-protection checks described above.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of [melhorescartoes.com.br](#).

- The request stayed on [melhorescartoes.com.br](#). It was not redirected to another domain. CLEAR
- DNS for this domain is served by [cloudflare.com](#), across 2 name servers. NOTED
- The registration is paid up to 2030-06-05. CLEAR
- The earliest public archive of this site is from 2021-05-13. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about melhorescartoes.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
