Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is a Portuguese-language parcel-tracking service branded “Melhor Rastreio.” It allows visitors to submit shipment codes, view delivery status across multiple carriers, receive email notifications, and create or access an account; its apparent business model is a free logistics utility associated with the broader Melhor Envio service ecosystem.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent parcel-tracking purpose, names supported carriers including Correios, Jadlog, Loggi, J&T, Total Express, Buslog, Azul, and LATAM Cargo, and contains no identified phishing, impersonation, malicious-content, or other fraud indicators. The presence of login and registration functions is consistent with the stated notification and tracking features; behavioral testing did not identify cloaking, hidden forms, external password submission, wallet activity, clipboard manipulation, or other abuse mechanisms. Some non-standard external requests and client-side errors were observed during interaction, but they were not attributed to a confirmed malicious pattern and do not override the otherwise consistent site behavior.

EVIDENCE

- The homepage describes free parcel tracking, shipment-status monitoring, notifications, and account registration without identified red-flag content.
- The domain was registered on 2016-03-11 and is approximately 10.43 years old.
- External reputation checks recorded zero malicious and zero suspicious detections, with no phishing or blacklist hit.

Regulatory Verification Notes

The service appears to be a logistics utility rather than a financial, brokerage, or otherwise regulated offering, so no financial licensing claim is evident from the supplied content. The pages do not state a licensing authority or license number, which is a limited disclosure point rather than evidence of wrongdoing. The apparent connection to Melhor Envio is presented through the site’s content, but the real-world operator has not been independently verified; accordingly, the site is best described as apparently legitimate and evidence-consistent, not as identity-proven. A clean third-party broker-reputation context provides no adverse signal.

EVIDENCE

- The homepage describes a free parcel-tracking tool and provides carrier-support and help information rather than regulated financial services.
- Transport encryption uses a valid DV certificate issued by Amazon RSA 2048 M01, valid through 2026-10-14.
- The supplied content does not identify a licensing authority or license number.

What to Verify Next

Before credential or payment-related interaction, an organization should independently confirm the operator's relationship with Melhor Envio through an official, separately sourced channel. Account users should review the applicable privacy, notification, and account-use terms, while any later paid service or commercial transaction should be checked for clear merchant identity, return or cancellation terms, and payment-provider protections. Any applicable registration or licensing requirement should be confirmed with the relevant official registry if the service expands beyond parcel tracking.

EVIDENCE

- The homepage offers account registration, login, and email shipment notifications, making privacy and account-use terms relevant to ordinary due diligence.
- The homepage identifies the service as a carrier-aggregation tracking utility and provides help guidance for shipment issues.
- No payment, investment, or other regulated financial feature was identified in the supplied page content.

Summary Verdict

The available evidence supports a high-trust, low-risk posture and is consistent with an established, apparently legitimate website. The principal qualification is that this conclusion concerns the site's observed risk and legitimacy signals, not independent proof of the real-world operator's identity.

Infrastructure Integrity

The site is served through Amazon infrastructure on AS16509 and is protected by CDN/WAF edge delivery; the observed addresses were edge servers rather than identified origin candidates. This architecture mitigates direct origin exposure and supports service resilience, but remains a protective technical measure rather than proof of organizational legitimacy.

Closing Assessment

Ordinary use is proportionate to the available evidence, subject to independent confirmation of the operator and standard privacy, commercial, and payment-protection checks before sensitive or paid interactions.

Written analysis generated 2026-08-12 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of melhorrastreio.com.br.

- The request stayed on melhorrastreio.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by awsdns-08.net, across 4 name servers. NOTED
- The registration is paid up to 2028-03-11. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about melhorrastreio.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
