

Is mennen.org a scam? TrustSniffer's high-risk assessment: 5/100

mennen.org

Verdict

5

OUT OF 100

CRITICAL RISK

mennen.org shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

A personal website for Paul Mennen containing trip reports, aviation-related pages, DIY electronics projects, items listed for sale, and contact information. Static informational content with no forms or financial requests.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

Paul

What mennen.org served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2002.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

This is a personal homepage for Paul Mennen presenting travel reports, aviation material, electronics and other DIY projects, personal information, contact details, and listings for items offered for sale; its apparent purpose is an informational personal portfolio rather than a financial or transactional service.

Scam/Impersonation Risk

No identity contradiction, brand impersonation, or phishing form was observed in the supplied page analysis. The homepage and associated personal pages present ordinary autobiographical, aviation, and project content, with no login form, financial request, wallet connection, or other sensitive interaction mechanism. However, this benign presentation is materially outweighed by external threat detections: the domain is reported as malicious by four evaluated detections, marked suspicious by one, and appears on confirmed blacklists from two sources. This creates a direct reputation contradiction and supports a clearly cautionary posture even though the visible site content itself shows no obvious abuse pattern.

EVIDENCE

- The homepage is titled “Paul Mennen’s web site” and contains trip reports, aviation pages, DIY projects, personal links, and item-sale references.
- The homepage analysis records no forms, no sensitive form, no login form, and no wallet-related activity.
- External reputation assessment records 4 malicious and 1 suspicious detections, with blacklist status confirmed by 2 sources.

Regulatory Verification Notes

The site appears to be a personal website rather than a provider offering a regulated financial service. Its available pages do not present a corporate legal identity, regulatory authorization, or license number; this is a disclosure limitation for institutional onboarding, not independent proof of misconduct. The real-world operator identity remains unverified, and the external blacklist findings should be treated as the controlling reputational concern rather than being offset by the site’s ordinary personal content. A broker-intelligence lookup produced no matching result, which provides no affirmative regulatory assurance.

EVIDENCE

- The supplied page content identifies the site as a personal homepage/portfolio and records no clear monetization or financial interaction.
- The domain was registered on 2000-01-31 and is approximately 26.57 years old; registrar: Domain.com – Network Solutions, LLC.
- Hosting is on AS22611, InMotion Hosting, Inc., US.
- The site uses a DV TLS certificate issued by YR2, valid through 2026-10-19.

What to Verify Next

Before any sensitive interaction, an institution should independently confirm that the domain is the intended destination through a separately obtained contact route and should validate the blacklist detections with the relevant threat-intelligence providers. Any proposed commercial relationship should also require independent confirmation of the operator’s legal identity, contractual counterpart, and payment destination. Credential submission, account access, or financial activity should remain suspended unless those checks resolve the reputation contradiction.

EVIDENCE

- The site’s contact information is published on its personal homepage, but the operator identity is not independently verified.
- The site presents no login, payment, or financial-request workflow in the supplied capture.
- The transport layer is encrypted, but the certificate uses domain validation rather than stronger organizational validation.

Summary Verdict

The website has a personal, non-financial presentation and no observed on-page abuse mechanics, but the confirmed external blacklist and malicious detections create a critical trust posture for sensitive interaction. The available evidence does not establish that the apparent personal-site identity is the real-world operator, so the site should not be treated as suitable for credential, account, or financial use.

Infrastructure Integrity

The site is protected by a CDN/WAF arrangement, with observed CDN edge infrastructure and a potential origin candidate; this provides some exposure mitigation but is not evidence of legitimacy. The underlying hosting is associated with InMotion Hosting, and the infrastructure review identified one edge IP alongside one potential origin IP.

Closing Assessment

Sensitive use should be deferred pending independent resolution of the reputation findings and confirmation of the responsible party through trusted, separately sourced channels.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01

Governance Risk
 - The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02

Sensitive Interaction Risk
 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of mennen.org.

- The request stayed on mennen.org. It was not redirected to another domain. CLEAR
- Registration is published under Domain.com - Network Solutions, LLC. CLEAR
- DNS for this domain is served by inmotionhosting.com, across 2 name servers. NOTED
- The registration is paid up to 2027-01-31. NOTED
- The earliest public archive of this site is from 2002-01-28. CLEAR
- It is hosted on INMOTION, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about mennen.org at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
