

Is mensagemaniversario.com.br legit? TrustSniffer's high-trust assessment: 76/100

mensagemaniversario.com.br

Verdict

76

OUT OF 100

HIGH TRUST

mensagemaniversario.com.br appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 75%.

What this site appears to be

Portuguese-language site offering birthday messages and phrases for many recipient categories. Site includes sharing buttons, consent/cookie banner, and extensive third-party advertising/analytics vendor disclosures.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2009.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is a Portuguese-language informational content site presenting birthday messages, greetings, and phrases organized for recipients such as friends, parents, partners, children, relatives, and colleagues. Its apparent business model is free access to shareable written content supported by advertising, consent-based third-party analytics, and possible newsletter or promotional placements.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents ordinary greeting content rather than a login, payment, investment, or cryptocurrency service; the available page analysis found no phishing indicators, sensitive forms, brand impersonation, or other fraud markers. External reputation checks were clean, and the domain has a sustained historical presence consistent with an established content property. This supports an apparently legitimate, low-risk assessment for ordinary browsing, while not independently proving the real-world operator's identity.

EVIDENCE

- The homepage contains birthday messages and phrases for categories including friends, parents, spouses, partners, children, relatives, and work colleagues, with sharing options and no login form or sensitive submission field.
- The domain was registered on 2008-12-14 and is 17.67 years old; the registration record expires on 2028-12-14.
- The site has 291 web-archive snapshots spanning 2009–2026, with 18 years tracked and a maximum recorded gap of 2 years.
- The domain is ranked 75827 and is within the global top million traffic ranking; evaluated reputation checks recorded zero malicious and zero suspicious detections.

Regulatory Verification Notes

The site's apparent role is a free greetings publisher, not a financial, investment, payment, or other regulated-service provider, so no licensing claim is identified in the supplied content. The operator's real-world identity remains independently unverified: the registration record names Adriano Guimaraes Frazao, but the available evidence does not establish that this person operates the website. No third-party broker-data match was identified. The main regulatory consideration is therefore identity and disclosure confirmation rather than an indication of prohibited activity.

EVIDENCE

- The homepage is categorized as blog/article content and describes birthday messages, greetings, phrases, and sharing functions rather than a regulated commercial service.
- The supplied registration record identifies Adriano Guimaraes Frazao as the owner.
- The site's transport encryption uses a DV TLS certificate issued by YE1, valid through 2026-09-26.
- The site is served through AS16276, operated by OVH - OVH SAS, FR.

What to Verify Next

Before any credential or payment interaction beyond ordinary content use, an independent check should confirm the operator's identity and the official purpose of any newsletter or promotional activity. The site's consent controls and third-party disclosures should also be reviewed so that tracking preferences are understood and limited where appropriate. If the site later introduces paid services or regulated financial functionality, the relevant licensing and corporate-registration details should be confirmed directly with the applicable registry.

EVIDENCE

- The homepage displays a consent/cookie banner and disclosures for third-party advertising and analytics providers.
- The page contains one form associated with date input, consent handling, and newsletter signup; no sensitive form was detected.
- Observed browser behavior included 44 external XHR requests and 30 external POST requests, with 17 non-whitelisted XHR requests and 8 non-whitelisted POST requests.
- Interaction testing recorded no wallet connection, wallet-sensitive activity, wallet drainer, clipboard-hijacking, hidden-form, or password-external-form behavior.

Summary Verdict

The website has a high-trust, low-risk posture and the available evidence is consistent with an established, apparently legitimate content site. Its legitimacy should be understood as evidence-consistent rather than identity-proven, because the real-world operator has not been independently verified.

Infrastructure Integrity

The site is protected by a CDN/WAF layer, with observed edge addresses associated with AS16276 and OVH - OVH SAS, FR; the origin server IP was not observable in this analysis. This infrastructure reduces direct exposure of the origin and is a mitigating security measure, but infrastructure protection alone is not proof of operator legitimacy.

Closing Assessment

Normal browsing and sharing of the site's informational content are proportionate; before submitting credentials or making any payment, ordinary independent checks of merchant identity, applicable terms, returns, and payment protection should be completed.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of mensagemaniversario.com.br.

- The request stayed on mensagemaniversario.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by awsdns-10.org, across 4 name servers. NOTED
- The registration is paid up to 2028-12-14. CLEAR
- The earliest public archive of this site is from 2009-01-30. CLEAR
- It is hosted on OVH, from a server in CA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about mensagemaniversario.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
